

DH-PFWB5-10ac

5GHz AC867 20dBi Outdoor Wireless CPE

Product Overview

500+ Mbps throughput- a result of powerful hardware platform with 802.11ac technology based radio and a proprietary data transmission protocol (TDMA). Incorporating a QCA 9563 CPU (750 MHz), a QCA 9882 radio and 64 MBytes of RAM and 16 MBytes of flash memory the, DH-PFWB5-10ac series devices are an ideal solution for capacity demanding applications. State of the art RF design with great output power and sensitivity parameters improve range and capacity over the highest modulation- 256 QAM. The 24V Gigabit Ethernet port (passive PoE) allows utilizing the full capacity of the radio when used in a point-to-point or point-to-multipoint network design. DH-PFWB5-10ac series devices are backwards compatible with DaHua Wireless devices using TDMA mode, which helps to expand or upgrade existing networks using the latest technologies over time.

Features

- Integrated 5 GHz (2x2) MIMO radio
- Frequency 5.150- 5.850 GHz (FCC 5.150- 5.250 and 5.725-
- 5.850 GHz)
- High performance and stability
- IP-66 standards rated enclosure
- Improved noise immunity
- TDMA ensures reliable communication
- Powerful OS
- Dual firmware

• Built-in tools including Site Survey, Link Test, Antenna Alignment, Spectrum Analyzer, Ping & Trace help in configuration and debugging

 \cdot Recommended for 0~5km PTP/PTMP wireless connection(as a station in PTMP link)

Data Rates 120, 50, 60, 50 Mbps 802.11 ac @ 80 MHz: 866, 780, 650, 585, 520, 390, 260, 195, 130, 65 Mbps
Error Correction FEC, LDPC
Duplexing Scheme Time division duplex
Transmission Distance 0-5km (recommended), max≥7km
Antenna
Type Integrated directional panel antenna
Gain 20dBi
Wired
Interface 10/100/1000 Base-T, RJ45
