General description	
<p>The FLIR TG267 lets you both see and evaluate the hot and cold spots that can indicate serious issues. Ideal for commercial electrical, facility maintenance, and HVAC applications, the FLIR TG267 reduces diagnostic time while simplifying repair and maintenance reporting. FLIR MSX enhancement improves image clarity by embossing visual scene details on full thermal images, providing added context to help you accurately target potential faults and troubleshoot repairs. Record images to monitor maintenance history and reassure your customer that problems have been resolved.</p>	
<p>Key features:</p> <ul style="list-style-type: none"> • See beyond the limitations of single-spot IR thermometers with a 160 × 120 (19,200 pixel) true thermal imager. • FLIR patented MSX enhancement adds sharp visual detail to thermal images, making it easier to diagnose problems. • Measure a wide range of temperatures, from -25°C to 380°C (-13°F to 716°F). • Multipoint Laser pointer provides a circle to clearly show the area you are measuring. • Thermocouple Probe connector provides the use of General Purpose Type K Thermocouple Probe (to 260°C (500°F)) • Rugged and reliable with an IP54 enclosure that protects the camera from dirt, dust, and oil.

---	---

38.3.4.5.1 目的

本试验模拟外部短路。

待试验电池或电池组经一段时间的加热后，使其外壳温度稳定到 $57 \pm 4^\circ\text{C}$ 。加热时间取决于电池或电池组的大小和设计，并进行评估和记录。如果无法评估，小型电池和电池组应至少为 6h，大型电池和电池组应至少为 12h。然后使电池或电池组在 $57 \pm 4^\circ\text{C}$ 下经受总外部电阻小于 0.1 欧姆的短路条件。

这一短路条件应在电池或电池组外壳温度回到 $57 \pm 4^\circ\text{C}$ 后继续至少 1 小时，对大型电池组，温度下降到最高温升值的一半，并要低于该值。

短路和温度下降过程应在试验环境温度条件下进行。

38.3.4.5.1 Purpose

This test simulates an external short circuit.

38.3.4.5.2 Test procedure

The cell or battery to be tested shall be shall be heated for a period of time necessary to reach a homogeneous stabilized temperature of $57 \pm 4^\circ\text{C}$, measured on the external case. This period of time depends on the size and design of the cell or battery and should be assessed and documented. If this assessment is not feasible, the exposure time shall be at least 6 hours for small cells and small batteries, and 12 hours for large cells and large batteries. Then the cell or battery at $57 \pm 4^\circ\text{C}$ shall be subjected to one short circuit condition with a total external resistance of less than 0.1 ohm.

This short circuit condition is continued for at least one hour after the cell or battery external case temperature has returned to $57 \pm 4^\circ\text{C}$, or in the case of the large batteries, has decreased by half of the maximum temperature increase observed during the test and remains below that value.

The short circuit and cooling down phases shall be conducted at least at ambient temperature.

38.3.4.5.3 Requirement

Cells and batteries meet this requirement if their external temperature does not exceed 170°C and there is no disassembly, no rupture and no fire within six hours of this test.

UN 38.3 测试方法、数据及结果 Test method and data

38.3.4.8 试验 T.8: 强制放电 Test T.8: Forced discharge	P
--	---

38.3.4.8.1 目的
 本试验评估原电池或充电电池承受强制放电状况的能力。

38.3.4.8.2 试验程序
 每个电池必须在环境温度下与 12 伏的直流电电源串联在起始电流等于制造商给定的最大放电电流的条件下强制放电。
 将适当大小和额定值的电阻负荷与试验电池串联，计算得出给定的放电电流。对每个电池进行强制放电，放电的时间（小时）应等于其额定容量除以初始试验电流（安培）。

38.3.4.8.3 要求
 原电池或充电电池如在试验过程中和试验后 7 天内无解体，无起火，即符合本项要求。

38.3.4.8.1 Purpose
 This test evaluates the ability of a primary or a rechargeable cell to withstand a forced discharge condition.

38.3.4.8.2 Test procedure
 Each cell shall be forced discharged at ambient temperature by connecting it in series with a 12V D.C. power supply at an initial current equal to the maximum discharge current specified by the manufacturer.
 The specified discharge current is to be obtained by connecting a resistive load of the appropriate size and rating in series with the test cell. Each cell shall be forced discharged for a time interval (in hours) equal to its rated capacity divided by the initial test current (in ampere).

38.3.4.8.3 Requirement
 Primary or rechargeable cells meet this requirement if there is no dis assembly and no fire during the test and within seven days after the test.
