

# VEGA

## VFI100

### Addressable remote indicator

#### FEATURES & BENEFITS

- Provides high reliability and error detection
- Short circuit isolators in each device
- Large capacity, up to 240 devices per loop
- Manual addressing via VPU100 hand held programmer
- Auto addressing capability (Control panel feature)
- OEM password protection
- Digital checking of double address
- Line quality information

#### SPECIFICATION

The FI100 remote indicator is a high output LED device designed around a fully digital Vega protocol for addressable analogue fire system.

It is a compact device providing high efficiency and low power consumption

A versatile product which has many applications in fire alarm systems

Provides visual indication of inaccessible detectors.

High quality LED indicator combined with high aesthetics.

Can be mounted on both a wall or ceiling.

Flush or surface Mounting

TECHNICAL SPECIFICATIONS	
Average Current Consumption (ON condition)	4.5 mA
Humidity (non condensing)	95%
Operating Temperature Range	-30°C / +70°C
Body Colour	White
Lens colour	Red
Dimensions	80 x 80 x 27
