

## esserbus transponder for special detectors

## Features:

- 4 detector group inputs for conventional connection of special fire detectors
- Line monitoring acc. to EN 54-13 possible
- · Integrated loop isolator
- 2 programmable relay outputs for reset of the special detector with flexible reset times

## Part-No.: 808623.40

For connection of special detectors and associated reset functions with evaluation of pre-alarm, fault and alarm. The transponder module can be adapted to the different reset behaviour of the connected special detectors.

The inputs and outputs of the transponder can be linked together in such a way that switching on or resetting a signal input leads to short-term activation of the reset input of the special detector. In order, to support various special detectors, the inputs of the transponder can be programmed with a suppression time of up to 255 seconds at reset.

Operating voltage 10 ... 28 V DC
Quiescent current @ 12 V DC approx. 12 mA

Current consumption max. 120 mA @ 12 V DC

 $\begin{array}{lll} \mbox{Contact load relay} & 30 \mbox{ V DC / 1 A} \\ \mbox{Ambient temperature} & -10 \mbox{ °C} \dots 50 \mbox{ °C} \\ \mbox{Air humidity} & < 95 \mbox{ \%} \\ \end{array}$ 

Type of protection IP 40 (in housing)
Weight approx. 28 g

Dimensions W: 82 mm H: 72 mm D: 20 mm

Declaration of Performance DoP-21057130701

The transponder can only be operated at a FlexES Control with the above mentioned features. At IQ8Control and Compact series control panels, the loop devices behaves like an Alarm transponder. Minimum requirements: Tools 8000 ≥ V1.25R000 FlexES Control ≥ V4.07R000 (Container V1.06)

## Accessories:

781137 DC/DC converter output voltage 24 V DC for the standard-compliant monitoring of the power
