the gate's rotating
axis

IDEAL FOR MEDIUM AND LARGE GATES.

Sturdy, compact, and reliable, it is the operator for medium and large gates of up to 5 m (16 ft) in length, per gate leaf.

THE ADVANTAGES OF CAME'S **ATI**

- Available in **reversible and irreversible mode**.
- Can open up to 180° (with the FL-180 accessory).
- Fully covered and protected endless scrow.
- Amperometric obstruction detection.

24 VOLT VERSION

- The 24 V versions can work in emergency mode during power outages.
- The 24 V versions feature a simplified connection system with a single three-conductor cable to control the motor and the encoder.

USER-FRIENDLY AND STURDY

The outer shell is entirely made of aluminium to make it sturdy and resistant to weather conditions. The practical door makes it easy to reach the motor release key for manually opening the gate leaf in case of need.

TOTAL CONTROL

Ati's 230 V AC electronics, besides the normal control and safety features, provide easy management of the gate's movement, plus features such as partial opening. The control panel runs safety test before each gate opening and closing operation (i.e. self-diagnosis).

SAFETY UNDER CONTROL

With the 24 V DC versions, when any obstruction prevents the gate's movement, the "amperometric detection device" activates to immediately block or invert the movement.

ATI TECHNOLOGY

GUARANTEED 24 VOLTS

The 24 V DC gearmotors are designed for intensive duty and are guaranteed to work even during power outages. This icon also means that a product is powered by low voltage.

EN TESTED SAFETY

This operator is tested in conformity with European Standards on impact forces.

120 V AC

Operator or gearmotor that runs on 120 V AC.

Came is a market leading home, industrial, and special technological projects automation manufacturing company. A full range of household solutions: from operators for gates and garage doors, to shutter and awning winding motors, and even home automation control, to burglar proof and video entry systems. Technology and reliability to serve your business, thanks to solutions designed for powering large industrial doors, automatic doors, street barriers, turnstiles, access control systems and parking facilities.
