

Superior & tasteful security presence

Discouraging burglars from breaking in

The perfect around-the-clock visual deterrent that maximises external security on any property. The Grade 2 Deltabell-WE delivers a high audible siren, strobe and a choice of coloured bases and lids, to warn off burglars and complement every building.

DELTABELL-WE

Fast & easy installation with a unique levelling mechanism

Consisting of four rotating guide holes and a spirit level, every installation can be adapted for an efficient and professional finish, without the need to line up, screw or drill multiple holes.

Work with both hands thanks to the Deltabell-WE hinged lid

Every Deltabell-WE cover is hinged and locks into place for the easiest installation and service.

Meet the required security standard with Grading options

The Deltabell-WE is Grade 2 for the supreme security any installation needs.

Superbly stylish with fully customisable options

• Different coloured covers & bases

Pick the base from either red, green, white, amber, blue or black and then pick the lid from red, white, yellow, black, blue or chrome for the desired look.

Beat the burglar with tamper protection

Any sabotage attempts from the front or back, or power supply cut off will result in an alarm activation, independently from the control panel. This ensures maximum security is maintained against accidental or malicious tampering of the system.

Avoid deafening the installer with Engineer Hold-Off

When the sounder is initially powered, with the tamper switch open, the sounder will not activate, which makes installation much safer. There is also a Remote Engineer Hold-Off feature which is invaluable when the system is serviced, as it allows for easy maintenance without the fear of unwanted activation.

Meet installation standards with low current consumption

When the alarm and strobe are activated, the Deltabell-WE has low current consumption, which is an important consideration when meeting today's installation standards.

Partcode	DELTABELL-WE
Key Features	
Sound output	98dB
Number of piezos	1
Strobe LED	✓
Engineer Hold-Off	✓
Comfort LED	✓
Front and rear tamper protection	✓
3V / 5A lithium battery included	BATT-ES1
Signal Strength Indicators (SSI)	✓
Minimum battery life (years)	2
Warranty	2 years
Accessories	
Polycarbonate base	✓
Cover sold separately	✓
Certifications	
Electrical conformity	CE
EN50131	Grade 2
Environmental class	IV
	CA12.01330

Faster installation, less invasion, upsell opportunities & the same superior security with two-way wireless technology

• No wires, no fuss

As the system is fully wireless there is no need to run wiring by drilling through walls, which saves you time and money.

• One-Push-To-Learn

A feature in all Enforcer wireless devices that means learning them onto the system can be done in seconds. A simple one button learning feature for easy installation.

• Signal Strength Indicators (SSI)

SSI in all Enforcer wireless devices allow them to be optimally positioned during installation, without the need to refer back to the panel.

• Instant Two-Way Device Control (ITDC)

This enables the instant wake up and instant sleep of each Enforcer wireless device on the system to preserve battery power and operability, while maintaining security.

Protected whatever the weather with sealed electronics

The electronic components are protected by a fully sealed unit with a rubber gasket, so that the sounder remains protected in even the harshest environment. This also provides added peace of mind that the sounder will always activate in the event of an alarm.

Attention grabbing alarms with the single piezo sounder & strobe

Upon an alarm activation, the Deltabell WE produces a loud
