

Product Feature

- Reproduces the frequency of first impact
- Reproduces the frequency of glass flexing
- Reproduces the frequency of glass breaking
- Used to test the effectiveness of the break glass detectors and sensors.

Technical Specification

Operating Voltage:	9V battery
Battery Life:	2000+ operations
Operating Temperature:	10°C to 40°C
Storage Temperature:	-20°C to 60°C
Simulated Glass:	Plate glass
