Welcome to Imou Router

SSID: Imou-XXXXXX

Try Now

3. Follow the on-screen instructions to set up the Internet connection.

Method 2: Use the Imou Life App

1. Download the Imou Life App.
[App Store] [Google Play] **OR** [Imou Life]

2. Open the Imou Life App and log in.

ⓘ If you are a new user, please register an account first.

3. Add your devices. Follow the instructions on the app to complete the setup and connect to the internet.

Mesh Network

This router supports mesh network.
A mesh network can be configured with one main router and multiple satellite nodes.
ⓘ The main router is the router you connect to the modem or the Internet access port.

Method 1: Via a Web Browser

Visit http://imouwifi.net, and log in with your ID and password. Click **Mesh Network** at the upper right coner and follow the step-by-step instructions to complete the setup.

← → C http://imouwifi.net

Router | Network | Wi-Fi | More Settings | Mesh Networking

Method 2: Use the WPS/MESH Button

1. Plug in all routers and power them on.
ⓘ Position the satellite nodes and the main router within 3 meters (9.84 ft).

2. Press the WPS/MESH button on the main router to enter mesh networking process. Wait until indicator flashes red.

3. Press the WPS/MESH button on the satellite nodes within 2 minutes for them to establish a connection with the main router. Once connected, the indicators will turn off.

ⓘ • If you need to group multiple satellite nodes, please repeat step 2 and 3 for each of the nodes.
• Mesh networking support up to 4 satellite nodes.

FAQ

Q1: What should I do if I can't access the router's management page?
• Reboot your router and try again.
• Check your Wi-Fi connection.
• Use another Web browser such as Google Chrome.
• Restart your device.

Q2: What should I do if I can't access Internet?
• Reboot your modem and router, then try again.
• Check the Internet is working. With an Ethernet cable connecting the modem to the computer directly.

Q3: What should I do if I forget my Web management page password?
• Check the Web password on the label at the bottom of the router.
• When the router is power on, use a pin to press and hold the RESET button on the back until the LED blinks. Then the password will restore to the default that marked on the label.

Q4: What can I do if my Wi-Fi devices cannot connect over Wi-Fi to the router?
Please try to check:
• You have enabled the router's SSID network and it displays in your Wi-Fi client's scanning list.
• You have entered the correct Wi-Fi password when connecting your devices to the Wi-Fi network.
If you failed to address the problem, you can reset the router to factory default settings.
