

## List of ONVIF cameras tested with the *GSM Gate Control Pro* product

For details and information on router configuration, port forwarding and dyndns configuration please read the “*Reference guide to the ONVIF camera support function*” document.

For the URLs of cameras not listed below the followings may be at your help: the camera’s technical manual, the “*ONVIF Detector*” software made by the manufacturer (available on the manufacturer’s website: [www.tell.hu](http://www.tell.hu)), the “*ONVIF Device Manager*” software (<http://sourceforge.net/projects/onvifdm>), or the following website: <https://www.ispyconnect.com/sources.aspx>

If the camera has been configured to skip requesting a username and password to display the picture, please use the following URL format: **rtsp://ip\_address/link**

If the camera has been configured to request a username and password to display the picture, please use the following URL format: **rtsp://username:password@ip\_address/link**

---

### Definitions:

**ip\_address** : replace with the WAN (external) IP address of the router to which the camera connects to  
**username:password** : replace with the username and password configured in the camera profile  
**554** : default rtsp port (if you configure a different port number, use the configured one in the URL)
