3. Standalone Installation

4. Door Sensor & Exit Button Connection

5. Lock Relay Connection

The system supports Normally Opened Lock and Normally Closed Lock. The NO LOCK (normally unlocked when power-on) is connected with 'NO' and 'COM' terminals, and the NC LOCK (normally locked when power-on) is connected with 'NC' and 'COM' terminals. Take NC Lock as an example below:

6. Power Connection

- Recommended power supply: 12V 1.5A
- To share the power with other devices, use a power supply with higher current ratings.

7. Ethernet Connection

Connect the device and computer software over an Ethernet cable. An example is shown below:

Default IP address: 192.168.1.201 Subnet mask: 255.255.255.0

IP address: 192.168.1.130 Subnet mask: 255.255.255.0

Note: In LAN, IP addresses of the server (PC) and the device must be in the same network segment when connecting to BioTime 8.0 software.

Click on [Comm.] > [Ethernet] > [IP Address], input the IP address and click on [OK].

User registration

a. Register on the device

Click [M/OK] > Main Menu > User Mgt. to register new user. Enter user name, ID, verification mode, register face, fingerprint, password and user photo.

| Main Menu | | | User Mgt. | New User |
|-------------------|----------------|----------------------|-----------------|--|
| | | | 👱 New User | User ID 1 |
| User Mgt. | User Role | COMM. | All Users | Name |
