

■ Features

- 8 channel actuator in a compact size
- Suitable for various and mixed applications
- For AX, C-load, capacitive & inductive of loads
- Program via ETS5.0 software
- Manual control via Push button
- Programmable various time and scene function
- 3 years warranty

■ Applications

- Building Automation
- Lighting switch
- Shutter/Blind control(Planned)
- Heating control
- Ventilation function

■ Description

The KNX actuator is a 8 channel device with high quality independent latching relay for switch, shutter or any possible mixed applications. The compact design with 4 units (72 mm) wide modular makes it suitable for installation in the distribution board on 35 mm mounting rails in the EIB / KNX application. The connection to the KNX bus is implemented via a bus connection terminal. The switching relays are particularly suitable for switching ohmic loads, capacitive loads, for instance LED drivers and inductive loads as well as motors in shutter or blind applications. The actuator are powered via the EIB / KNX and do not require any additional power supply.

■ Configuration and Commissioning

The application program(database) can be downloaded via Online Catalogs from ETS or via <http://www.meanwell.com/productCatalog.aspx>

■ Typical application

⊙ Application 1: Work with non-dimmable driver

⊙ Application 2: Work with Heater

■ Recommended Screwdriver, Wire and Torque Setting

1. Screwdriver(Width*Thick): Slotted screwdriver 2.5*0.4~3.5*0.6
2. Wire: 0.5~4.0mm² solid core or 0.5~2.5mm² finely stranded
3. Torque: 0.8Nm
