1 Introduction

1.2 Overview

The handheld thermal monocular is a handheld hermal camera with functions of observation. hot spot mark, distance measurement, Wi-Fi hot spot, and so on. The high-sensitivity built-in IR detector provides you with clear view even in total darkness.

### 1.3 Features

- High performance chip, and DDE
- $1024 \times 768$ Resolution OLED di splay
- Built-in rechargeable Li-ion battery
- Upilt-in rechargeable Li-ion battery

Up to five hours continuous r
(Wi-Fi hot spot function off)

- USB Cable
- Small in size and light in weight
1.4 Functions

Distance Measurement:
The de vice realizes distance measurement function after marking the top and bottom of arget, and input the target height.

## Hot Spot Mark

The de vice detects and marks the hot spot of highest temperature.

Wi-Fi \& Hot Spot:
Device can capture snapshots, record videos and set parameters via APP after being
connected to your phone

Device supports pallet switch and distance measurement.

Built-in memory module supports video recording/snapshot capturing.

Digital Zoom:
Device supports $1 \times$ and $2 \times$ digital zoom.

2 Appearance
2.1 Dimensions

Take the figure below for the dimensions of the handheld thermal monocula.

$189.4 \mathrm{~mm}\left(7.46^{\prime \prime}\right)$
$57.6 \mathrm{~mm}\left(2.27^{\prime \prime}\right) \quad 73.7 \mathrm{~mm}\left(2.90^{\prime \prime}\right)$

Note: the dimension varies according to different camera modes.
2.2 B uttons and Interfaces

Take the figure below for the buttons and interfaces description of handheld thermal monocular

cable.
Note: For detailed operations of the menu, refer to Me mu Operation Section

## 3 Basic Operations

3.1 Charging the Monocular

Note: Please charge the monocular with the delivered USB cable and power adapter. The charging temperature should be $0{ }^{\circ} \mathrm{C}$ to $45^{\circ} \mathrm{C}\left(32^{\circ} \mathrm{F}\right.$ to $\left.113^{\circ} \mathrm{F}\right)$.
Steps:
Lift the USB cover.

2. Plug in the USB cable and connect the ot her terminal into the power adapter. Plug the power adapter to the power source.
When the monocular is turned on, the OSD (on-screen display) shows the battery status. When you see the Low Battery status, charge the monocular and ensure it's working properly
Battery LED Indicator Status

## Red Flash Error occurred

- Solid Red Battery is properly charged
- Solid Green Battery is fully charged
- Off Battery is not charged.
3.2 Power On and Off

Power On
Hold the POWER button for four seconds and Hold the POWER button for four seconds
the LED indicator in the front turns green. After the device is powered on, the indicato keeps green.

Refer to the figure below for the main view of the monocular

W-Fi Hot Spot Digita Zoom som
Fivem- Bathery

Power Off
When the monocular is turned on, hold the
POW ER button for four seconds to power off
the device.
3.3 Thermal View Observation Steps:
. Power on the monocular
2. Hold the monocular and make sure the eyepiece covers your eye.

3. Slide the sight adjust knob to adjust the dopter until the OSD text or image is clear

Note: You must perform the sight adjustment before any further use of the
monocular. monocular
4. Point the monocular towards the target of the view
3.4 Basic Operation

Connect the thermal monocular to your PC with USB cable, you can expo
videos and captured snapshots.
Steps:

1. Hold the bution to enter the menu and select the icon
2. Press and the icon turns to and the Wi-Fi hot spot function is disabled.
Connect the thermal monocular to your PC with USB cable, you can see a detected removable disk.
Notes:

- When you connect the device to PC for the first time, it installs the drive program automatically.
- When you connect the device to
PC, the device displays images, but functions such as recording capturing and Wi-Fi hot spot disabled.

## File Export

Steps:
. Connect the thermal monocular to your PC with USB cable and open the detected ideos and snapshots.

Select and copy the videos to PC and play the file with the player, Select and copy the snapshots to PC and view the file
3. Disconnect the device from your PC

## Upgrade

Steps:

1. Connect the thermal monocular to your PC with USB cable and open the detected disk.
Copy the upgrade file and paste it to the root directory of the device.
2. Disconnect the device from your PC
3. Reboot the monocular and the device upgrades automatically. The upgrading upgrades automatically. The upgrading
proce ss will be displayed in the main interface.

4 Main Function
4.1 Menu Operation

When the monocular is turned on, hold the button for three seconds to display the
OSD menu OSD menu
