About the Guide

- This quick start guide is for reference only. Minor difference might be found in user interface.
- All the design and software here are subject to change without prior written notice.
- All trademarks and registered trademarks mentioned are the properties of their respective owners.
- Please visit our website or contact your local service engineer for more information.
- If there is any uncertainty or controversy, please refer to our final explanation.

Step 4

Wait for booting to be finished, and then the camera indicator flashes with green light.

Step 5
Do the following operations to finish adding camera.

Note:
- If you have more than one camera, do step 5 to add them one by one.
- If the Wi-Fi network has changed or the indicator status goes wrong, reset the camera, and then do step 5 to add it again.

Installing Camera

Note: Make sure that the mounting surface is smooth and strong enough to hold at least three times of the device weight.

Mounting Surface

Mounting Foam

Camera

Step 1 Stick the mounting foam on the camera pedestal.
Step 2 Power up the camera.
Step 3 Adjust the monitoring angle as needed, and then attach the pedestal on the mounting surface, press and hold it for 10 s.

FAQ

▶ Q: How to reset the camera to factory default?
Press the reset button for 10 s, then the camera will restore to factory default and reboot automatically.

▶ Q: The device cannot boot up?
Check the LED indicator status. If it is not green light on, reset the camera and configure the camera again.

▶ Q: What is the Wi-Fi password of the camera's Wi-Fi signal?
The password is the safety code on the device label.

▶ Q: The device is offline?
Check the indicator status:
- If the green light is on, check whether the router can connect to the Internet. If Internet is working, restart the camera.
- If the red light flashes, reset the camera, and then configure the camera again.
- If the red light is on, it means the camera is faulty.

▶ Q: How to connect the camera to a new Wi-Fi?
- If camera is online, select **Device > Network Config** to change the Wi-Fi connection.
- If camera is offline, reset the camera, and then configure the camera again.
