FOR YOU

# THE NICE GROUP IS THE IDEAL PARTNER FOR ANY PROJECT

**Unique solutions, blending technology, innovation, quality and design.**

Systems for the automation and control of gates, garage doors, road barriers, blinds, shutters, lighting and alarm systems are now integrated and can be managed by smart and intuitive interfaces: practical, functional and elegant solutions to help you enjoy your living spaces to the full.

Automation professionals, architects and contractors can find in The Nice Group their privileged partner, which provides comprehensive support throughout the realisation of any project, from design to installation.

Nice means the simplest integration, the most elegant design and the most advanced electronics.

## INTEGRATION

Systems for the automation and control of gates, garage doors, blinds, shutters and alarm systems, with integrated management using smart and intuitive interfaces.

With Nice app you can control in a simple and comfortable way any connected device, both locally and remotely.

## COMFORT

Small, slim and coloured, ideal to carry in your pocket and bag, or to use as stylish key rings; table-top or wall-mounted: the control of the entire home at your fingertips.

With the Nice radio control systems, the choice is yours.

## SAFETY

A wide range of accessories with a minimalist, modern and discrete design, featuring BlueBUS or all-wireless technology to guarantee the maximum safety in residential, industrial and public contexts.

## VERSATILITY

Nice Tag, miniaturized transmitters and control units: disappearing inside the standard wall plates, they're ideal for restorations and upgrades of existing systems, to control home automations without the need to replace the existing system or performing masonry work.

## HI-SPEED, FASTER THAN EVER

**High-speed 24 V motors for the automation of sliding and swing gates.** The perfect answer where rapid manoeuvres are required, ensuring the shortest standing time and the maximum safety. A complete range responding to all installation needs.

Thanks to the advanced control units and the sensors for sensitive edges making the obstacle detection technology even more precise, **Hi-Speed systems are synonym to reliability, security and comfort.**

## **SPY, THE SMART SYSTEM FOR GARAGE DOORS**

**Spy is the range of motors and control units for garage doors automation, ideal for residential applications: a complete, smart and safe system.**

The motor moves along a rail, without chains or other noisy mechanisms to install. The separate control unit, always close at hand, with built-in LED courtesy light and three practical keys to control the automation; **easier and more convenient for programming and maintenance.**

## NICE R&D CENTRE AND LABS

**Nice makes significant investments to guarantee even higher quality standards, which not only comply with directives and regulations, but also allow continuous product improvement, by exploiting high-tech procedures and experimentation and an innovative approach to open integration.**

Through its advanced laboratories Nice carefully tests and controls its products every day in order to grant safety, quality, reliability and durability over time.

Nice has adopted a quality system that complies with standard **ISO 9001**, recognized worldwide for the quality management. The laboratory also meets the strict quality requirements of **EN 17025** standards.

Nice CE certified products comply with the European Directives and the leading internationally recognized standards.

Nice laboratories have been certified by outside certification bodies, attesting their technical expertise and conformity to carry out the tests that cover all the needs and the numerous products manufactured by the Nice group:

- LCIE (Francia)
- IMQ (Italia)
- CTC Advanced (Germania)
- Intertek (Svezia)
- UL (USA)

## GUARANTEE

**Nice control devices and automations for gates, garage doors, industrial doors and barriers are controlled and tested to give you a long-term guarantee: 3 years** from the production date indicated on each product.

# BETTER SERVICE, CLOSER TO YOU

Nice provides you, the professional, with a complete range of solutions designed to enhance your offer to the customer and to simplify installation and programming of all automation systems, from the simplest to the most sophisticated.

**Technology, reliability and service.**

## TRAINING

Nice offers a packed programme of **training courses on products, sales techniques, installation and programming**, to provide a complete professional training.

Particular attention and exhaustive coverage is dedicated to current European legislation and standards, with the aim of simplifying the procedure to obtain the declaration of conformity and guarantee the complete safety of the automation systems installed.

## AFTER-SALES SERVICE

Nice guarantees **efficient and prompt service, even online, on the [www.niceforyou.com](http://www.niceforyou.com) website**, with contents dedicated both to the professional and to the end user.

- Section dedicated to **installation and programming tutorial videos, with the answers to the most frequently asked questions.**
- **Section where you can download instruction manuals, quick guides, catalogues and brochures.**
- Form you can use to ask for **the updated software or firmware of any programmer or control unit.**

# NICE PEOPLE MAKE NICE THINGS

## **TheNicePlace**

An area covering more than 3,000 sq.m adjacent to company headquarters, devoted to meetings and the exchange, sharing and generation of knowledge, is a “living” place, open to new experiences and initiatives that respond to the needs of a company that is continuing to grow, and reflect its international nature.

With this “social hub”, Nice aims to involve people and the community in an ongoing process, so as to stimulate the development of knowledge inside and outside of the company, individually and collectively, as well as to enhance the knowledge and skills of each individual.

**[www.thenicegroup.com](http://www.thenicegroup.com)**

## **Nice Feel (for everyone everywhere liberty)**

Through its “F.e.e.l.” project, Nice promotes a whole series of activities, initiatives and products that bring greater freedom of movement, autonomy and expression, including for people with special needs, such as the elderly and people with disabilities.

**Nice Experience**  
to discover, learn about and touch  
Nice automation systems.

# GUIDE TO READING THE CATALOGUE

1. If you know the name of the product, you can quickly find it out in the index on page 3;
2. If you know the part number but not the product name, go to pages 234/243 for the alphabetical list of part numbers;
3. If you don't know the product name or part number, look up the desired application in the index; the first few pages in each section feature a simple **selection guide** that helps identify the model of motor with the most suitable characteristics for your automation needs;

## **SURFACE MOUNTED, WITH ARTICULATED ARM, RECOMMENDED FOR SMALL POSTS, IN KIT**

For leaves up to 1.8 m, 24 Vdc irreversible with built-in control unit equipped with BlueBUS technology, compatible for operation with Solemyo and Opera. Mechanical limit switch on closing.

**WALKYKIT**  
pages 58/61

for 1-leaf

→ **WALKY1024KCE**

for 2-leaf

→ **WALKY2024KCE**

If you are looking to customise your automation system, refer to the compatibility table on page 230/233 to choose the most suitable electronics for each motor.

# TOONA 5 HS

SOLEMYO OPERA BLUEBUS 24V

**For hi-speed automation of swing gates with leaves up to 5 m or 400 kg**, ideal for residential and industrial applications.

24 Vdc, electromechanical gear motor, surface mounted, with magnetic encoder.

 **Quick manoeuvres: 90° opening in about 16\* seconds.**

**Reliable:** the magnetic encoder ensures the safeguard of set values over time and precise obstacle detection.

**Silent:** patented layout of internal parts and lead nut in bronze.

**Sturdy:** thanks to the housing, made up of two tough aluminium shells with polyester paint finish; more resistant to atmospheric agents. Internal moving parts completely in steel, light alloys and technopolymers.

**Generously sized and practical connection compartment:** rapid and easy access from above to internal parts located in the upper section of the motor.

**Simple installation and maintenance:** with built-in capacitor.

**Moonclever control unit MC824H:**

- simple programming, by means of a single key;
- automatic memorization of limit switches on opening and closing with self-learning function;
- automatic fault diagnostics;
- programming of pause time;
- pedestrian pass door;
- deceleration on opening and closing;
- obstacle detection with dual technology;
- operation in event of power failure by means of optional rechargeable batteries (PS324);
- provision for connection of latest generation resistive sensitive edges.

\* Considering standard installation, excluding acceleration and deceleration.

# TOONA 6 HS

SOLEMYO OPERA BLUEBUS 24V

## For hi-speed automation of swing gates with leaves up to 6 m or 1450 kg.

24 Vdc electromechanical gear motor, surface mounted, with magnetic encoder.

### The most powerful:

ideal for industrial applications, designed for intensive use.

 **Quick manoeuvres: 90° opening in about 30\* seconds.**

**Reliable:** the magnetic encoder ensures the safeguard of set values over time and precise obstacle detection.

**Silent:** patented layout of internal parts and lead nut in bronze.

**Sturdy:** thanks to the housing, made up of two tough aluminium shells with polyester paint finish; more resistant to atmospheric agents.

Internal moving parts completely in steel, light alloys and technopolymers.

### Generously sized and practical connection compartment:

rapid and easy access from above to internal parts located in the upper section of the motor.

### Simple installation and maintenance:

with built-in capacitor.

### Moonclever control unit MC824H:

- simple programming, by means of a single key;
- automatic memorization of limit switches on opening and closing with self-learning function;
- automatic fault diagnostics;
- programming of pause time;
- pedestrian pass door;
- deceleration on opening and closing;
- obstacle detection with dual technology;
- operation in event of power failure by means of optional rechargeable batteries (PS324);
- provision for connection of latest generation resistive sensitive edges.

\* Considering standard installation, excluding acceleration and deceleration.

# HYKE HS

SOLEMYO OPERA BLUEBUS 24V

**For hi-speed automation of swing gates with leaves up to 3 m or 270 kg**, ideal for residential applications even with large columns. 24 Vdc electromechanical gear motor with articulated arm, surface mounted, with magnetic encoder.

**Ideal for intensive use and quick manoeuvres: 90° opening in about 10\* seconds.**

**Ultra-powerful and reliable:** thanks to the torque of 500 Nm and encoder technology, for millimetric precision and reliability.

**Safe movement** with dual technology obstacle detection.

## Sturdy

thanks to the housing in aluminium with polyester paint finish, resistant to atmospheric agents.

**Two irreversible 24 Vdc versions** with limit switches on opening and closing: with built-in control unit (HK7024) and without control unit (HK7224).

**Practical and quick installation:** the articulated arm is adjustable in length for maximum flexibility.

**Simple and precise limit switch adjustment:** mechanical stops and micrometric adjustment screws.

**No black out:** with the optional batteries (PS124) housed inside the gear motor.

## Built-in control unit (HK7024):

- simple programming via a single key;
- self-learning of opening and closing limit positions;
- automatic fault diagnostics;
- pause time programming;
- pedestrian pass door;
- deceleration on opening and closing;
- obstacle detection with dual technology;
- provision for connection of latest generation sensitive edges.

\* Considering standard installation, excluding acceleration and deceleration.

Adjustable anti-crushing arm

AND ALPHABETICAL INDEX

# M-FAB HS

SOLEMYO OPERA BLUEBUS 24V

**For hi-speed automation of swing gates with leaves up to 3 m or 300 kg, underground installation, ideal for residential applications.**

24 Vdc electromechanical gear motor, with magnetic encoder.

**Ideal for intensive use and quick manoeuvres: 90° opening in about 8\* seconds.**

**Foundation boxes externally chamfered, Fab Box with mechanical stop on opening:**

- in stainless steel (SFAB2024KCEI), ideal for use in extreme conditions,
- with the cataphoresis paint finish (MFABBOX), highly resistant to corrosion.

**Reliable and resistant:** motors made up of solid internal parts in metal. New IP67 waterproof die cast aluminium.

**Total freedom of choice:** release from inside and outside, two key-operated models or freely compatible lever version and easily activated with just one hand.

**Simple to use:** mechanical stop system on closure. Standard opening max. 110°, optional opening 360°.

**Totally compatible** with the previous Metro series.

**Moonclever MC824H control unit:**

- simple programming, by means of a single key;
- self-learning of opening and closing limit positions;
- automatic fault diagnostics;
- programming of pause time;
- pedestrian pass door;
- deceleration on opening and closing;
- obstacle detection with dual technology;
- operation in event of power failure by means of optional rechargeable batteries (PS324);
- provision for connection of latest generation resistive sensitive edges.

\* Considering standard installation, excluding acceleration and deceleration.

COMPATIBILITY TABLE  
AND ALPHABETICAL INDEX

# ROBUS 250/500 HS

SOLEMYO OPERA BLUEBUS 24V

For hi-speed automation of sliding gates weighing up to 250 kg (RB250HS) and up to 500 kg (RB500HS), for residential and industrial applications.

24 Vdc electromechanical gear motor.

 **Ideal for intensive use**, opening a 4 m gate takes around 10\* seconds with RB250HS and around 9\* seconds with RB500HS.

**User-friendly:** thanks to the Nice BlueBUS technology, the control unit can be connected to up to seven couples of photocells, control, security and signalling devices, using two wires only.

**Practical:** the control unit and PS124 buffer battery (optional) can be connected by means of a simple connector and can be housed directly inside Robus.

**Advanced:** the temperature sensor adapts the motor power to the climatic conditions and at the same time thermal cut-out.

A master/slave selection automatically synchronises two motors. This means it is possible to automate 2-leaf sliding gates set opposite each other.

**Intelligent:** thanks to the obstacle detection system and automatic programming of the working times. Self-diagnosis by means of a flashing light. 8 programming levels.

**Safe:** acceleration and deceleration can be adjusted at the beginning and at the end of each opening and closing manoeuvre.

**Sturdy:** base and release in pressure die cast with easy to open handle.

**Very quiet:** gear motor on bearings.

\* Considering standard installation, excluding acceleration and deceleration.

# RUN 400/1200 HS

OPERA BLUEBUS 24V

**For hi-speed automation of sliding gates weighing up to 400 kg (RUN400HS) and up to 1200 kg (RUN1200HS), for residential and industrial applications.**

24 Vdc electromechanical gear motor.

**The fastest:** ideal for industrial applications, designed for intensive use.

**Rapid manoeuvres, with opening and closing;** opening a 4 m gate takes around 6\* seconds with RUN400HS, while opening a 7 m gate takes around 18\* seconds with RUN1200HS.

**User-friendly:** thanks to the Nice BlueBUS technology, the control unit can be connected to up to seven couples of photocells, control, security and signalling devices, using two wires only.

**Practical:** the control unit and PS524 battery charger (to which two B12-B batteries should be added) can be connected by means of a simple connector and can be housed directly inside the motor.

**Advanced:** the temperature sensor adapts the motor power to the climatic conditions and at the same time thermal cut-out. A master/slave selection automatically synchronises two motors. This means it is possible to automate 2-leaf sliding gates set opposite each other.

**Intelligent:** thanks to the obstacle detection system and automatic programming of the working times. Self-diagnosis by means of a flashing light. 8 programming levels.

**Safe:** acceleration and deceleration can be adjusted at the beginning and at the end of each opening and closing manoeuvre.

**Sturdy:** base and release in pressure die cast with easy to open handle.

**Very quiet:** gear motor on bearings.

\* Considering standard installation, excluding acceleration and deceleration.

# TOONA 4

SOLEMYO OPERA BLUEBUS 24V 230V

## For swing gates with leaves up to 3 m.

Electromechanical gear motor, surface mounted.

Also available in 24 Vdc version, with magnetic encoder.

Ideal for residential use.

**Reliable:** durability thanks to the housing, made up of two tough aluminium shells with polyester paint finish; more resistant to atmospheric agents.

Internal moving parts completely in steel, light alloys and technopolymers.

**Silent:** patented layout of internal parts and lead nut in bronze.

## Generously sized and practical connection compartment:

rapid and easy access from above to internal parts located in the upper section of the motor.

## Simple installation and maintenance;

with built-in capacitor.

## Recommended control units:

Mindy A6F, A60, A700F; for T04024 Moonclever MC824H.

**24 Vdc version** with magnetic encoder.

**Perfect for intensive use**, compatible with the control unit Moonclever MC824H:

- simple programming, by means of a single key;
- self-learning of opening and closing limit positions;
- automatic fault diagnostics;
- programming of pause time;
- pedestrian pass door;
- deceleration on opening and closing;
- obstacle detection with dual technology;
- operation in event of power failure by means of optional rechargeable batteries (PS324);
- provision for connection of latest generation resistive sensitive edges.

# TOONA 5

SOLEMYO OPERA BLUEBUS 24V 230V

## For swing gates with leaves up to 5 m.

Electromechanical gear motor, surface mounted.  
Also available in 24 Vdc version,  
with magnetic encoder.  
Ideal for residential and industrial use.

**Reliable:** durability thanks to the housing, made up of two tough aluminium shells with polyester paint finish; more resistant to atmospheric agents.

Internal moving parts completely in steel, light alloys and technopolymers.

**T05024I** ideal for intensive work load, thanks to the torque of 2200 Nm, can work on continuous duty on large sized gates.

**Silent:** patented layout of internal parts and lead nut in bronze.

## Generously sized and practical connection compartment:

rapid and easy access from above to internal parts located in the upper section of the motor.

**Simple installation and maintenance,** with built-in capacitor.

## Recommended control units:

Mindy A6F, A60, A700F;  
for T05024 and T05024I Moonclever MC824H.

**24 Vdc version** with magnetic encoder.

**Perfect for intensive use,** compatible with the control unit Moonclever MC824H:

- simple programming, by means of a single key;
- self-learning of opening and closing limit positions;
- automatic fault diagnostics;
- programming of pause time;
- pedestrian pass door;
- deceleration on opening and closing;
- obstacle detection with dual technology;
- operation in event of power failure by means of optional rechargeable batteries (PS324);
- provision for connection of latest generation resistive sensitive edges.

\*60 Hz version available on request.

\*\* With optimal installation.

\*\*\* The reduction in number of manoeuvres with respect to the version T05024 depends solely on the lower manoeuvre speed.

## UTILISATION LIMITS

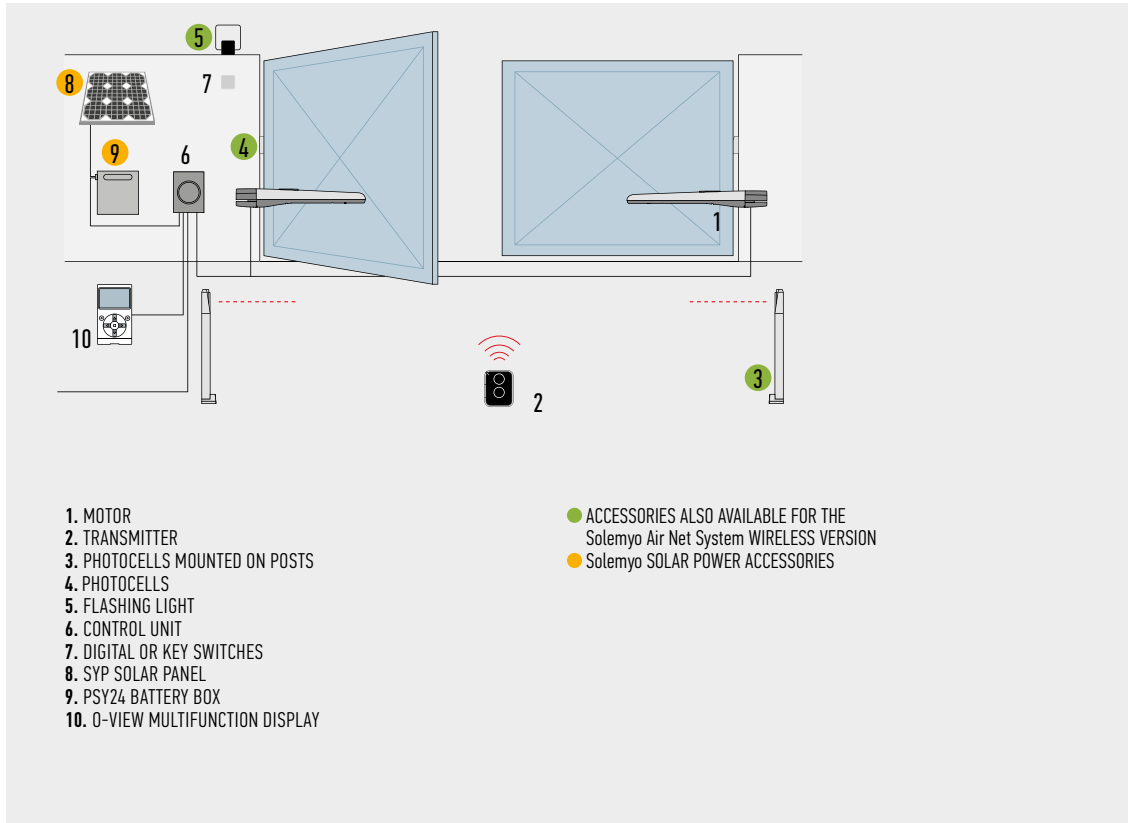

## DIMENSIONS

The shape, the height of the gate and the weather conditions can considerably reduce the values shown in the graph to the side. Use in windy areas 230 Vac models.

\* With optimal installation.

## UTILISATION LIMITS

The shape, the height of the gate and the weather conditions can  
considerably reduce the values shown in the graph to the side.

## DIMENSIONS

## THE KIT CONTAINS:

**T04024**  
2 ELECTROMECHANICAL IRREVERSIBLE GEAR  
MOTORS, SURFACE MOUNTED.  
WITH MECHANICAL STOP ON OPENING.

**ON2E**  
1 TRANSMITTER  
433.92 MHz, 2 CHANNELS.

**MC824H**  
1 CONTROL UNIT  
WITH OXI PLUG-IN RECEIVER.

**EPMB**  
1 COUPLE OF EXTERNAL  
PHOTOCELLS DESIGNED FOR  
CONNECTION BY NICE BLUEBUS.

**EKS**  
1 KEY SELECTOR SWITCH FOR  
OUTDOOR INSTALLATION.

**ELB**  
1 FLASHING LIGHT  
WITH INTEGRATED AERIAL.

**TS**  
1 SIGNBOARD.

# OLTRE 1824

NEW SOLEMYO OPERA BLUEBUS 24V

**The invisible Nice motor for swing gates weighing up to 100 kg and with a leaf length of up to 1.8 m.**  
24 VDC irreversible electromechanical gear motor.

### Minimum visual impact

The motor is small enough to be easily installed inside the profiles of the gate leaf or in very slim posts (with a minimum diameter of 55 mm).

### Easy to install

The bottom-up installation simplifies fixing of the motor inside the post.

### Resistant

IP67 die-cast aluminium structure:  
Oltre resists even the harshest weather conditions.

### Quick and reliable

Complete opening (90°) of the leaf in about 10 seconds.  
Oltre has been tested for use at 60 cycles/hour, making it suitable for all contexts with intensive use.

### Safe

Easy-to-use external manual release: the gate can always be opened manually, without having to take it apart.

### Dedicated Moonclever MC824L control unit:

- easy to programme;
- self-learning of opening and closing limit positions;
- automatic fault diagnostics;
- programming of pause time;
- pedestrian pass door;
- deceleration during opening and closing;
- obstacle detection with dual technology;
- operation in event of power failure by means of optional rechargeable batteries (PS324);
- provision for connection of resistive sensitive edges.

SOLEMYO OPERA BLUEBUS 24V

**For swing gates with leaves up to 1.8 m.**  
Especially suited to gates in wood or PVC.  
Irreversible electromechanical gear motor at 24 Vdc, with articulated arm.

**Ultra compact:** ideal for pedestrian gates, recommended for small posts (width 8 cm).

**Safe:** thanks to the irreversible motor and anti-shear arm with built-in mechanical stop on closure (with installation of entire arm).

**Practical:** the articulated arm enables installation in specific conditions, such as in the presence of small walls or obstacles adjacent to the post.

**Quick:** no waiting in front of the gate, just 7 seconds to open or close (in optimal installation conditions, with reduced arm and 90° opening).

**Convenient:** incorporable flashing LED indicator, with courtesy light function (WLT, optional); rapid motor release for manual movement of the gate.

**Built-in control unit:**

- simple programming;
- self-learning of opening and closing limit positions;
- automatic fault diagnostics;
- programming of pause time;
- pedestrian pass door;
- deceleration on opening and closing;
- provision for connection of latest generation resistive sensitive edges.

**No black out:** operation in the event of a power failure by means of optional batteries (PS424) housed inside the motor.

SOLEMYO OPERA BLUEBUS 24V

## For swing gates with leaves up to 2.4 m, ideal for large columns.

Irreversible electromechanical 24 Vdc gear motor with articulated arm, surface mounted. Ideal for intensive use.

**Two irreversible 24 Vdc versions** with micrometric adjustment mechanical stops on opening and closing: with built-in control unit (H07124) and without control unit (H07224).

**Powerful** thanks to the 250 Nm torque.

**Resistant and compact:** 180 mm in width, ideal for any kind of post. Small shockproof body with aluminium base.

**Sturdy, aluminium anti-shearing arm.**

**Easy to install:** thanks to the new fixing bracket with quick connector for the motor. No welding.

**Sophisticated electronics with the built-in control unit,** just 3 keys to manage all programming operations:

- obstacle detection and possibility of connecting to 8.2 KOhm sensitive edge, fototest;
- automatic fault diagnostics;
- memorisation of opening and closing travel limits in self-learning mode;
- possibility of configuring the stop input in self-learning mode, NO, NC and the latest generation 8.2 KOhm resistive sensitive edges;
- deceleration on opening and closing;
- simple connection of pairs of additional photocells, foto2;
- programming of pause time;
- pedestrian open and partial open;
- clutch with anti-crushing safety mechanism.

**Energy saving with no black outs:**

3 standby modes to reduce mains consumption, or battery power consumption if connected to the Solemyo kit. Operation in the event of a power failure thanks to the optional batteries (PS124).

**Everything under control:** thanks to compatibility for operation with Opera system BUS T4, the unit can be used to expand the options of programming, control and diagnostics of the automation on site and remotely.

COMPATIBILITY TABLE  
 AND ALPHABETICAL INDEX

## For swing gates with leaves up to 3.5 m, ideal for large columns.

Irreversible electromechanical 24 Vdc gearmotor with articulated arm, surface mounted. Ideal for intensive use.

**Reliable**, durability thanks to the housing in aluminium with polyester paint finish, resistant to atmospheric agents.

**Ultra-powerful and delicate**: thanks to the torque of 500 Nm and encoder technology, for millimetric precision and reliability. Safety in movement with dual technology obstacle detection.

Adjustable anti-crushing arm

ADJUSTABLE ANTI-CRUSHING ARM

**Two irreversible 24 Vdc versions** with limit switches on opening and closing: with built-in control unit (HK7024) and without control unit (HK7224).

**Practical and quick installation:** the articulated arm is adjustable in length for maximum flexibility.

**Simple and precise limit switch adjustment:** mechanical stops and micrometric adjustment screws.

**Easy to operate release lever**, with metal lock and personalised Nice key. With provision for cable control.

**Savings, respect for the environment, and autonomy:** when connected to the buffer battery or Solemyo kit, consumption on standby is just 0.1 W.

**No black out:** with the optional batteries (PS124) housed inside the gear motor.

### Built-in control unit (HK7024):

- simple programming via a single key;
- self-learning of opening and closing limit positions;
- automatic fault diagnostics;
- pause time programming;
- pass door;
- deceleration on opening and closing;
- obstacle detection with dual technology;
- provision for connection of latest generation sensitive edges.

# HYPPO 7000

SOLEMYO OPERA BLUEBUS 24V 230V

**For swing gates with leaves up to 3 m, also ideal for large pillars.**

Electromechanical gear motor, surface mounted, also in 24 Vdc version with magnetic encoder, with articulated arm.

Single model for right and left leaves.

Two irreversible versions, with 230 Vac (HY7005) and 24 Vdc (HY7024) power supplies with magnetic encoder.

Fewer connections mean **quicker installation.**

**Pre-wired, incorporated double limit-switch** both during opening and closing (HY7005).

**Easy and quick to install:** thanks to fewer connections and nothing welded to the gates.

**Long-lasting:** solid metal mechanics.

**Compact:** shockproof bodywork with no sharp corners.

**Recommended control units:**

Mindy A6F, A60, A700F;  
for HY7024 Moonclever MC824H.

**24 Vdc version** with magnetic encoder.

**Perfect for intensive use,** compatible with the control unit Moonclever MC824H:

- simple programming, by means of a single key;
- self-learning of opening and closing limit positions;
- automatic fault diagnostics;
- programming of pause time;
- pedestrian pass door;
- deceleration on opening and closing;
- obstacle detection with dual technology;
- operation in event of power failure by means of optional rechargeable batteries (PS324);
- provision for connection of latest generation resistive sensitive edges.

# S-FAB

SOLEMYO OPERA BLUEBUS 24V

**For swing gates with leaves up to 2.3 m, underground installation, ultra compact.** Irreversible electromechanical 24 Vdc gear motor, ideal for intensive use.

**Sturdy and discreet:** compact foundation box with a height of only 81 mm. Steel with cathaphoresis paint finish guarantees optimal resistance to corrosion, and thickness of 2.5 mm guarantees strength. All this in just 52 mm of protrusion from the ground.

**Practical and quick installation** thanks to the exit lever on the gear motor attached directly on the leaf.

**Opening up to 180° as standard.**

**Reliable and sturdy:** the gear motor, in IP67 pressure die cast aluminium, suspended inside the housing to enable drainage of any deposits, ensures optimal water resistance.

Load-bearing foundation box with adjustable mechanical stops on opening and closing: the gear motor can also be installed later as required.

**Practical release** easy to operate from inside and outside, acting directly on the gear motor, easy to operate by means of the special key.

## SFAB2024, compatible with the control unit Moonclever MC424L, and for operation with Solemyo systems:

- simple programming via a single key;
- memorisation of opening and closing limit positions in self-learning mode;
- pause time programming;
- pass door;
- deceleration on opening and closing;
- obstacle detection;
- provision for connection of latest generation sensitive edges;
- operation in event of power failure by means of optional rechargeable batteries (PS124) with compartment in control unit.

## SFAB2124 with magnetic encoder, compatible with control unit Moonclever MC824H, with BlueBUS technology, and compatible for operation with Solemyo and Opera systems:

- simple programming via a single key;
- self-learning of opening and closing limit positions;
- automatic fault diagnostics;
- with output for courtesy light and maintenance indicator;
- speed settings on 5 levels;
- separate and configurable inputs for Step by Step, Open and Close;
- pause time programming;
- pass door;
- deceleration on opening and closing;
- obstacle detection with dual technology;
- provision for connection of latest generation sensitive edges;
- operation in event of power failure by means of optional rechargeable batteries (PS324) with compartment in control unit.

SOLEMYO 24V

**For swing gates with leaves up to 2.3 m, underground installation, ultra compact.**  
Irreversible electromechanical 24 Vdc gear motor.

**Sturdy and discreet:** compact foundation box with a height of only 81 mm.  
Steel with cataphoresis paint finish guarantees optimal resistance to corrosion, and thickness of 2.5 mm guarantees strength. All this in a protrusion of just 52 mm from the ground.

**Practical and quick installation** thanks to the exit lever on the gear motor attached directly on the leaf.

**Mechanical limit switches** adjustable on opening and closing.  
**Opening up to 180° as standard.**

**Reliable and sturdy:** the gear motor, in IP67 pressure die cast aluminium, suspended inside the housing to enable drainage of any deposits, ensures optimal water resistance.

**Practical release** from inside and outside, acting directly on the gear motor, easy to operate by means of the special key.

**Moonclever control unit MC424L:**

- easy programming by pressing a single button;
- clutch with anti-crush safety feature;
- automatic memorization of limit switches on opening and closing with self-learning function;
- programming of pause time;
- pedestrian pass door;
- deceleration on opening and closing;
- obstacle detection;
- provision for connection of latest generation resistive sensitive edges;
- continues to work even during power failures using optional (PS124) batteries that fit inside the control unit.

**The Era Gate accessories,** with a minimal, modern and discreet design, renovate Nice kits' style and performance.

# M-FAB

SOLEMYO OPERA BLUEBUS 24V 230V

## For swing gates with leaves up to 3 m, underground installation.

Irreversible electromechanical gear motor, also available in 24 Vdc versions with magnetic encoder.

3 types of electromechanical gear motors irreversible **M-Fab**.

**2 foundation boxes externally chamfered, Fab Box**, with mechanical stop on opening:

- in stainless steel (SFAB2024KCEI), ideal for use in extreme conditions,
- with the **cataphoresis paint finish** (MFABBOX), highly resistant to corrosion.

**Reliable and resistant:** motors made up of solid internal parts in metal. New IP67 waterproof die cast aluminium.

**Total freedom of choice:** release from inside and outside, two key-operated models or freely compatible lever version and easily activated with just one hand.

**Simple to use:** mechanical stop system on closure. Standard opening max. 110°, optional opening 360°.

**Totally compatible** with the previous Metro series.

**Recommended control units:** Mindy A6F, A60, A700F; for MFAB3024 Moonclever MC824H.

**24 Vdc version** with magnetic encoder.

**Perfect for intensive use**, compatible with the control unit Moonclever MC824H:

- simple programming, by means of a single key;
- self-learning of opening and closing limit positions;
- automatic fault diagnostics;
- programming of pause time;
- pedestrian pass door;
- deceleration on opening and closing;
- obstacle detection with dual technology;
- operation in event of power failure by means of optional rechargeable batteries (PS324);
- provision for connection of latest generation resistive sensitive edges.

COMPATIBILITY TABLE AND ALPHABETICAL INDEX

# L-FAB

SOLEMYO OPERA BLUEBUS 24V 230V

## For swing gates with leaves up to 4 m, underground installation.

Irreversible electromechanical gear motor, also available in 24 Vdc versions with magnetic encoder and mechanical stop.

Foundation boxes with mechanical stop on opening:

- in stainless steel (LFABBOX4I), ideal for use in extreme conditions,
- with cataphoresis paint finish (LFABBOX4), highly resistant to corrosion.

**Maximum freedom of choice:** release from inside or outside, two key or lever operated models, freely combinable and easy to operate with just one hand.

**Simple installation:** built-in mechanical stop system on closure.

Standard opening to 110°, or optional 360°.

**Ideal for intensive use, LFAB4024 model is compatible with the control unit Moonclever MC824H, with BlueBUS technology, Solemyo and Opera systems:**

- simple programming via a single key;
- self-learning of travel limits on opening and closing;
- self-diagnostics of faults;
- programming of pause time;
- pass door;
- deceleration on opening and closing;
- dual technology obstacle detection;
- operation in the event of a power failure with optional rechargeable batteries (PS324);
- provision for connection of latest generation sensitive edges.

LFAB4000 model is compatible with the control units A6F and A60.

RELIABILITY AND RESISTANCE

WATERPROOF, WITH IP67 PROTECTION RATING

### ACCESSORY FOR L-FAB

**BMA2**  
ADAPTORS FOR A DUAL MOTOR AUTOMATION, COMPATIBLE WITH THE MAJORITY OF FOUNDATION BOXES ON THE MARKET.

PC/PACK. 4

| CODE      | DESCRIPTION   | PACK/PALLET |
|-----------|---|-------------|
| LFAB4000  | IRREVERSIBLE 230 Vac WITH BUILT-IN MECHANICAL STOP ON CLOSING   | 18          |
| LFAB4024  | IRREVERSIBLE 24 Vdc, WITH MAGNETIC ENCODER, WITH MECHANICAL STOP ON CLOSING   | 18          |
| LFABBOX4  | FOUNDATION BOX WITH CATAPHORESIS PAINT FINISH FOR LFAB4000 AND LFAB4024 WITH BUILT-IN MECHANICAL STOP ON OPENING. COMPLETE WITH LEAF COUPLING LEVER | 18          |
| LFABBOX4I | STAINLESS STEEL FOUNDATION BOX FOR LFAB4000 AND LFAB4024 WITH BUILT-IN MECHANICAL STOP ON OPENING. COMPLETE WITH LEAF COUPLING LEVER                | 18          |

Note: key release mechanism, freely compatible with selection of models MEA2 and MEA3 motor.

# NAKED SLIDING 400

SOLEMYO OPERA BLUEBUS 24V

## Nice concealed motor for sliding gates up to 400 Kg with leaf length up to 6 m.

Motor with built-in control unit and absolute encoder which can be installed inside a compact post with suitable holes.

Its extremely small size allows the motor to be installed even in very slender posts, with interior size down to 140x140 mm.

**User-friendly:** thanks to the BlueBUS system, allowing the control unit to be connected to up to 7 pairs of photocells and control, security and signalling devices with just two wires.

**State-of-the-art:** it features a temperature sensor that adapts the motor force to weather conditions, also modulating the overload protection.

**Master/slave selection:** for automatic synchronisation even of 2 motors, allowing automation of sliding gates with two opposing leaves.

**Intelligent:** thanks to obstacle detection and automatic working time programming. Self-diagnostics with flashing light signalling.

**Safe:** adjustable acceleration and deceleration at the start and end of every opening and closing operation.

**User-friendly, precise limit switch adjustment:** integral absolute limit switch, quick learning with just one opening or closing operation with motor released.

**Practical:** control unit and optional PS124 buffer batteries can be connected by means of practical guided - connector.

**Flexible:** unlocking can be provided on both sides of the post and/or on the outside (with the K10 and KA1 accessories). Also easy to install on existing posts.

# SLIGHT

SOLEMYO OPERA BLUEBUS 24V

## Nice motor for sliding gates up to 400 kg with leaf length up to 6 m.

Motor with built-in control unit and absolute encoder.

**Innovative ultra-compact design:** the vertical configuration of the motor makes it easy to install even in narrow openings.

**User-friendly:** thanks to the BlueBUS system, it allows the control unit to be connected to up to 7 pairs of photocells and control, security and signalling devices with just two wires.

**Built-in LED light:** programmable as either a flashing or courtesy light, it warns of gate movement during opening and closing.

**Master/slave selection:** for automatic synchronisation even of 2 motors, allowing automation of sliding gates with two opposing leaves.

**Intelligent:** thanks to obstacle detection and automatic working time programming. Self-diagnostics with flashing light signalling.

**Safe:** adjustable acceleration and deceleration at the start and end of every opening and closing operation.

### Built-in absolute limit stop:

- simple and precise regulation thanks to the rapid learning in a single movement with the motor released;
- no bracket or accessory to be installed on the ratchet;
- particularly suitable in snow areas.

**Practical:** control unit and optional PS124 buffer batteries can be connected by means of practical guided - connector.

# SLIGHT KIT

SOLEMYO OPERA BLUEBUS 24V

## Nice motor for sliding gates up to 400 kg with leaf length up to 6 m.

Motor with built-in control unit and absolute encoder.

**Innovative ultra-compact design:** the vertical configuration of the motor makes it easy to install even in narrow openings.

**User-friendly:** thanks to the BlueBUS system, it allows the control unit to be connected to up to 7 pairs of photocells and control, security and signalling devices with just two wires.

**Built-in LED light:** programmable as either a flashing or courtesy light, it warns of gate movement during opening and closing.

**Master/slave selection:** for automatic synchronisation even of 2 motors, allowing automation of sliding gates with two opposing leaves.

**Intelligent:** thanks to obstacle detection and automatic working time programming. Self-diagnostics with flashing light signalling.

**Safe:** adjustable acceleration and deceleration at the start and end of every opening and closing operation.

### Built-in absolute limit stop:

- simple and precise regulation thanks to the rapid learning in a single movement with the motor released;
- no bracket or accessory to be installed on the ratchet;
- particularly suitable in snow areas.

**Practical:** control unit and optional PS124 buffer batteries can be connected by means of practical guided - connector.

**The Era Gate accessories,** with a minimal, modern and discreet design, renovate Nice kits' style and performance.

## DIMENSIONS

## THE KIT CONTAINS:

**SLH400**  
1 IRREVERSIBLE ELECTROMECHANICAL GEAR MOTOR, WITH BUILT-IN CONTROL UNIT AND ABSOLUTE ENCODER WITH BUILT-IN LED LIGHT.

**ON2E**  
2 TRANSMITTERS  
433.92 MHz, 2 CHANNELS.

**EPMB**  
1 COUPLE OF EXTERNAL PHOTOCELLS DESIGNED FOR CONNECTION BY NICE BLUEBUS.

**OXI**  
RECEIVERS WITH CONNECTOR  
4 CHANNELS.

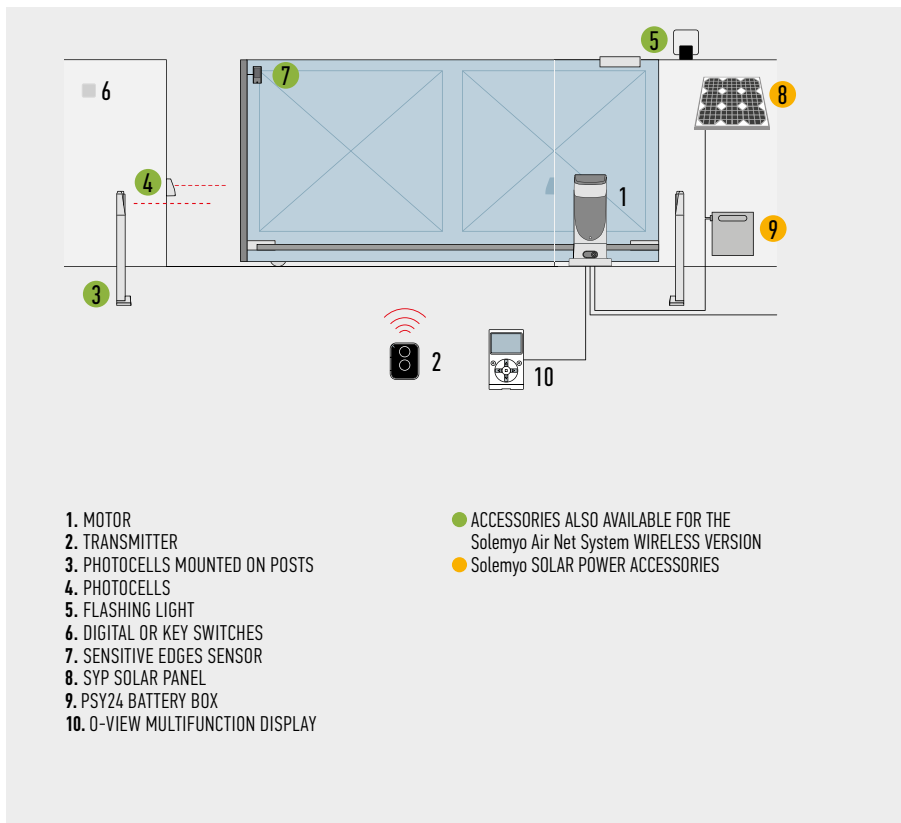

**ELB**  
1 FLASHING LIGHT  
WITH INTEGRATED AERIAL.

**TS**  
1 SIGNBOARD.

## INSTALLATION DIAGRAM

Nice recommends customers order products in pallets in order to facilitate storage and delivery, and ensure packs are uniform. The number of packs per single pallet has been specified for this reason. Approximate draft.

# ROBUS 400/600/1000

SOLEMYO OPERA BLUEBUS 24V

**For sliding gates weighing up to 400 kg (RB400), up to 600 kg (RB600) and up to 1000 kg (RB1000).**

**Versions with electromechanical limit switch (RB400/RB600/RB1000) and with inductive limit switch (RB400P/RB600P/RB1000P).**

**User-friendly:** the Nice BlueBUS technology, enables to power and control a maximum of seven couples of photocells using two wires only.

**Practical:** the control unit and PS124 buffer battery (optional) can be connected by means of a simple connector and can be housed directly inside the motor.

**Advanced:** RB400, RB600 and RB1000 are equipped with a temperature sensor: adapt the motor power to the climatic conditions and at the same time thermal cut-out. A master/slave selection automatically synchronises two motors. This means it is possible to automate 2-leaf sliding gates set opposite each other.

**Intelligent:** thanks to the obstacle detection system and automatic programming of the working times. Self-diagnosis by means of a flashing light. 8 programming levels.

**Safe:** acceleration and deceleration can be adjusted at the beginning and end of each opening and closing manoeuvre.

**Sturdy:** base and release in pressure die cast with easy to open handle.

**Very quiet:** gear motor on bearings.

# ROBUSKIT 400

SOLEMYO OPERA BLUEBUS 24V

## For sliding gates weighing up to 400 kg.

**User-friendly:** the Nice BlueBUS technology, enables to power and control a maximum of seven couples of photocells using two wires only.

**Practical:** the control unit and PS124 buffer battery (optional) can be connected by means of a simple connector and can be housed directly inside Robus.

**Advanced:** RB400 is equipped with a temperature sensor: adapt the motor power to the climatic conditions and at the same time thermal cut-out.

A master/slave selection automatically synchronises two motors. This means it is possible to automate 2-leaf sliding gates set opposite each other.

**Intelligent:** thanks to the obstacle detection system and automatic programming of the working times. Self-diagnosis by means of a flashing light. 8 programming levels.

**Safe:** acceleration and deceleration can be adjusted at the beginning and end of each opening and closing manoeuvre.

**Sturdy:** base and release in pressure die cast aluminium and epoxy paint finish.

**Very quiet:** gear motor on bearings.

**The Era Gate accessories,** with a minimal, modern and discreet design, renovate Nice kits' style and performance.

## DIMENSIONS

## THE KIT CONTAINS:

**RB400**  
1 IRREVERSIBLE ELECTROMECHANICAL GEAR MOTOR, WITH INCORPORATED CONTROL UNIT AND OXI PLUG-IN RECEIVER WHICH CAN BE USED FOR CONNECTIONS VIA NICE BLUEBUS.

**ON2E**  
1 TRANSMITTER  
433.92 MHz, 2 CHANNELS.

**EPMB**  
1 COUPLE OF EXTERNAL PHOTOCELLS DESIGNED FOR CONNECTION BY NICE BLUEBUS.

**EKS**  
1 KEY SELECTOR SWITCH FOR OUTDOOR INSTALLATION.

**ELB**  
1 FLASHING LIGHT WITH INTEGRATED AERIAL.

**TS**  
1 SIGNBOARD.

## INSTALLATION DIAGRAM

Nice recommends customers order products in pallets in order to facilitate storage and delivery, and ensure packs are uniform. The number of packs per single pallet has been specified for this reason. Approximate draft.

# RUN 1500

SOLEMYO OPERA BLUEBUS 24V

**For sliding gates weighing up to 1500 kg.**

**Versions with electromechanical limit switch (RUN1500) and with inductive limit switch (RUN1500P).**

**User-friendly:** the BlueBUS technology, enables to power and control a maximum of 7 couples of photocells using two wires only.

**Practical:** the control unit and PS124 buffer battery (optional) can be connected by means of a simple connector and can be housed directly inside the motor.

**Advanced:** the temperature sensor adapts the motor force to weather conditions, setting the thermal cut-out protection accordingly; a master/slave selection automatically synchronises 2 motors, enabling the automation of sliding gates with two opposing leaves.

**Intelligent:** thanks to the obstacle detection system and automatic programming of the working times. Self-diagnosis by means of a flashing light. 8 programming levels.

**Safe:** acceleration and deceleration can be adjusted at the beginning and end of each opening and closing manoeuvre.

**Sturdy:** aluminium release handle for easy opening.

**Very quiet:** gear motor on bearings.

CONTROL SYSTEMS AND ACCESSORIES

COMPATIBILITY TABLE AND ALPHABETICAL INDEX

# RUN 1800/2500

OPERA BLUEBUS 230V

**For sliding gates weighing up to 1800 kg (RUN1800) and up to 2500 kg (RUN2500).**

**Ventilated motor with inductive limit switch (RUN1800P/RUN2500P) or electromechanical limit switch (RUN1800/RUN2500I/RUN2500).**

**Suitable to operate in extreme conditions, in systems for intensive use.**

**Simple to install:** the BlueBUS system enables connections by means of just two wires between the control unit and up to 15 control safety and signalling devices.

**Safe:** the acceleration settings (at the start of the manoeuvre) and the deceleration settings (at the end of the manoeuvre) are precise and reliable.

**The temperature sensor:** Run is able to manage force, adapting it to the different climatic and environmental conditions, while adapting the thermal cut-out protection and intensity of self-ventilation, depending on the temperature reading.

A **master/slave** selection also automatically synchronises 2 motors, enabling the automation of sliding gates with two opposing leaves.

**Practical and functional:** the control unit (and inverter on version RUN2500I), housed inside Run, can be simply connected by means of the practical connector guide.

**Very quiet:** gear motor on bearings.

## RUN2500I version with built-in inverter

**Perfect movement:** the inverter enables the power supply and drive of the 3-phase motor with single-phase current at 230 Vac, acting on the frequency to adjust speed of the automation from a minimum of 8.2 m/min to maximum 15.4 m/min.

In the automation deceleration phase, the inverter, which dialogues with the control unit, increases the torque, thus improving performance and reducing the risk of the automation blocking on impact with obstacles.

| CODE            | DESCRIPTION   | PACK/PALLET |
|-----------------|---|-------------|
| <b>RUN1800</b>  | IRREVERSIBLE, 230 Vac, WITH BUILT-IN CONTROL UNIT, WITH ELECTROMECHANICAL LIMIT SWITCH, FOR SLIDING GATES WEIGHING UP TO 1800 kg                | 12          |

# TUB

400V

## For sliding gates weighing up to 3500 kg. Ideal for industrial use.

Irreversible electromechanical 400 Vac gear motor with built-in Mindy A500 control unit.

### Powerful:

550 W absorbed output and a peak thrust of over 400 Nm.

### Functionality and safety:

programmable, electronic brake which prevents gate inertia; self-ventilated motor to increase the working cycles; optional PIU card to increase the basic functions.

### Maximum durability and silence:

bronze and metal gears.

### Advanced:

Tub meets all requirements in terms of control, thanks to the functions which can be selected by means of dipswitches.

### Practical:

the lever release enables safe and simple operation.

# SELECTION GUIDE, COMPOSITION OF BARS AND ACCESSORIES

Bars and accessories are not included in the gear motor's code.

## S4BAR

- With specific 4 m bar  
Designed for:  
protective rubber trim  
and indicator lights

## M3BAR

- With 3 m bar  
Designed for:  
protective rubber trim  
and indicator lights

## M5BAR

- With 4 m bar  
Designed for:  
protective rubber trim,  
indicator lights,  
rack (1 pc), mobile stand

- With 5 m bar  
Designed for:  
protective rubber trim  
and indicator lights

## M7BAR

- With 5 m bar  
Designed for:  
protective rubber trim,  
indicator lights,  
rack (2 pcs), mobile stand

- With bar up to 6 m (3+3)\*  
Designed for:  
protective rubber trim,  
indicator lights,  
rack (2 pcs), mobile stand

- With bar up to 7 m (3+4)\*  
Designed for:  
protective rubber trim  
and indicator lights

\*Use XBA9 joint to assemble bars

## L9BAR

- With bar of 7 m (3+4)\*  
Designed for:  
protective rubber trim,  
indicator lights,  
rack (3 pcs),  
mobile stand

- With bar of 8 m (4+4)\*  
Designed for:  
protective rubber trim,  
indicator lights,  
rack (3 pcs),  
mobile stand

- With bar of 9 m (4+5)\*  
Designed for:  
protective rubber trim  
and indicator lights

\*Use XBA9 joint to assemble bars

# S-BAR

SOLEMYO OPERA BLUEBUS 24V

## Electromechanical road barrier system for control of road access.

24 Vdc gear motor with built-in control unit.

For bar up to 4 m.

**Strength and reliability:** robust structure in steel, new high strength balancing springs guaranteed up to 500,000 opening and closing operations and elliptical section bar with high wind-gust resistance.

Optional flashing or traffic light can be integrated in cover.

**More comfort and safety in programming and maintenance phases:** the separate enclosures for electronics and mechanics protect internal parts from potential risks.

**Rapid and easy access** to the control unit located in the upper section of the barrier body.

Simple fixture of the completely concealed photocells onto the specially designed seats on the barrier body.

**More safety and reliability:** obstacle detection and monitoring of motor absorption during automation movement.

Automatic fault diagnostics during operation with consequent signalling of fault type through specific flash sequences.

Provision for connection of latest generation optical and resistive sensitive edges (with 8.2 KOhm resistance).

**Energy saving:** the system sets to standby when not in use to save consumption.

**No blackouts:** emergency backup power with the optional batteries housed inside the case.

**Release from side with Nice triangular key,** can be installed on either side.

## IN ORDER TO HAVE A FULLY FUNCTIONAL BARRIER GATE OPERATOR SYSTEM:

1. CHOOSE THE GEAR MOTOR

2. SELECT THE BAR

3. COMPLETE THE SYSTEM WITH THE OPTIONAL ACCESSORIES

## Electromechanical road barrier system for control of road access.

24 Vdc gear motor with built-in control unit and loop detector.

### For bars up from 3 to 7 m.

**Modular:** bars are easily assembled using the aluminium expansion joint.

Possibility for intelligent control of two opposing automations thanks to "master/slave" function.

**Strength and reliability:** robust structure in steel, new high strength balancing springs guaranteed up to 1,000,000 opening and closing operations and elliptical section bar with high wind-gust resistance.

Optional flashing or traffic light can be integrated in cover.  
Encoder movement control and electromechanical limit switches.  
**More comfort and safety in programming and maintenance phases:** the separate enclosures for electronics and mechanics protect internal parts from potential risks.

**Rapid and easy access** to the control unit located in the upper section of the barrier body.

Simple fixture of the completely concealed photocells onto the specially designed seats on the barrier body.

**More safety and reliability:** obstacle detection and monitoring of motor absorption during automation movement.

Automatic fault diagnostics during operation with consequent signalling of fault type through specific flash sequences.

Provision for connection of latest generation optical and resistive sensitive edges (with 8.2 KOhm resistance).

**Energy saving:** the system sets to standby when not in use to save consumption.

**No blackouts:** emergency backup power with the optional batteries housed inside the case.

**Release from side with metal key,** can be installed on either side.

## IN ORDER TO HAVE A FULLY FUNCTIONAL BARRIER GATE OPERATOR SYSTEM:

## ACCESSORIES FOR M7BAR

# L-BAR

SOLEMYO OPERA BLUEBUS 24V

## Electromechanical road barrier system for control of road access.

24 Vdc gear motor with built-in control unit and loop detector.

## Powerful and fast, for bars from 7 to 9 m.

**Modular:** bars are easily assembled using the aluminium expansion joint.

Possibility for intelligent control of two opposing automations thanks to **"master/slave" function**.

**Strength and reliability:** robust structure in steel, new high strength balancing springs guaranteed up to 1,000,000 opening and closing operations and elliptical section bar with high wind-gust resistance.

Optional flashing or traffic light can be integrated in cover.

Encoder movement control and electromechanical limit switches.

**More comfort and safety in programming and maintenance phases:** the separate enclosures for electronics and mechanics protect internal parts from potential risks.

**Rapid and easy access** to the control unit located in the upper section of the barrier body.

Simple fixture of the completely concealed photocells onto the specially designed seats on the barrier body.

**More safety and reliability:** obstacle detection and monitoring of motor absorption during automation movement.

Automatic fault diagnostics during operation with consequent signalling of fault type through specific flash sequences.

Provision for connection of latest generation optical and resistive sensitive edges (with 8.2 KOhm resistance).

**Energy saving:** the system sets to standby when not in use to save consumption.

**No blackouts:** emergency backup power with the optional batteries housed inside the case.

**Release from side with metal key,** can be installed on either side.

## IN ORDER TO HAVE A FULLY FUNCTIONAL BARRIER GATE OPERATOR SYSTEM:

1. CHOOSE THE GEAR MOTOR

2. SELECT THE BAR

3. COMPLETE THE SYSTEM WITH THE OPTIONAL ACCESSORIES

## FOR BARS UP TO 9 m, IRREVERSIBLE 230 Vac, 24 Vdc MOTOR, WITH FOUNDATION PLATE:

| CODE   | DESCRIPTION   |

COMPATIBILITY TABLE AND ALPHABETICAL INDEX

# NICE WIDE, SOLID AND ESSENTIAL

## EASY TO INSTALL

Large front door for quick and easy access.  
The bar can be assembled either on the right or left.  
Easily removable reinforced gear motor support.

## VANDAL-PROOF SAFETY

Photocells integrated inside the barrier body,  
minimum visual impact and maximum protection.

## PRACTICAL TO MAINTAIN

The built-in control unit can be removed to  
simplify wiring and maintenance. A backup  
battery installed inside the control unit  
prevents blackout problems.

## COMFORTABLE AND INTUITIVE RELEASE

Easy release of barrier system thanks to  
a triangular key.

REMOVABLE COVER FOR EASY  
ACCESS TO THE INSIDE PARTS

# WIDE SYSTEM

NEW

24V

## Electromechanical road barrier system for control of road access.

24 Vdc gear motor, with built-in control unit, adjustable speed and anti-crush safety function.

**Two types of case available**, galvanized steel or stainless steel (AISI 304) in **three sizes from 3 to 7 metres long**.

### More comfort and safety in programming and maintenance

The same built-in control unit is used on all versions, and is installed in the bottom part of the barrier body. Large front door for quick and easy access. Easily-removable reinforced gear motor support.

### Maximum anti-crush safety

when both opening and closing; barrier body supports on the inside for minimum visual impact.

**Electronically-adjustable speed** from 3.5" (Wide M) to 5" (Wide L) for fast opening.

### Sturdiness, reliability and easy installation

Elliptical section bar for lighter weight and higher wind-gust resistance; special profile for fast assembly of the accessories.

Optional pivot joint to protect the barrier in the event of collision.

The bar can be assembled either on the right or left.

**Easy to balance, thanks** to practical spring tension adjustment.

**No blackouts:** operation is guaranteed in the event of power outages by the PS234 backup battery installed inside the control unit.

**Release with triangular key** protected against the weather.

# SPYKIT 550

NEW OPERA 24V

**For sectional doors up to 9 m<sup>2</sup> and up-and-over doors (including canopy doors) up to 10.5 m<sup>2</sup>.**

24 Vdc irreversible electromechanical gear motor for residential use, **transmission with rack on the rail.**

To be combined with SPYRAIL321, SPYRAIL162 and SPYRAIL081 rails.

**Functional and stylish:** the motor is the only component that moves on the rail, there are no chains or other noisy mechanisms. Ideal for any architectural context.

### Handy

Separate control unit: more practical and convenient for programming and maintenance.

Built-in LED courtesy light. Three practical keys to control the automation.

### Quick to install

Modular rail with assembly accessories. Limit switches easy to position along the rail with no need to stand and work on the ceiling. No chains or other noisy mechanisms to install.

### Easy to program

Simple and fast basic programming, using the Quick Setup procedure. Simplified advanced programming, using 0-View.

**ON/OFF release system:** pulling the release knob once releases the motor; pulling it a second time blocks the motor again, in any position along the rail.

**Inexpensive to run and environmentally-friendly:** when connected to the mains in standby mode, the control unit consumes 1.5 W.

**Safe:** obstacle detection, motor power monitoring during travel, diagnostic messages via flashing light and courtesy light.

Adjustable acceleration and deceleration at the start and end of each manoeuvre.

Ready for installation of the latest generation 8.2 kOhm resistive sensitive edges.

### Optimised logistics

For practical management and transport, the rails are available in different sizes: single 3.2 m long rail, or supplied in two 1.6 m sections plus a 0.8 m extension.

### THE KIT CONTAINS:

**SPY550**  
1 X SPY550 GEARMOTOR,  
550 N.

**SPYBOX**  
1 CONTROL UNIT WITH  
BUILT-IN LED COURTESY LIGHT  
AND RECEIVER.

**FLO2RE**  
1 X 433.92 MHz 2 CHANNEL  
TRANSMITTER.

| CODE      | DESCRIPTION   | PACK/PALLET |
|-----------|---|-------------|
| SPY550KCE | KIT FOR THE AUTOMATION OF SECTIONAL AND UP-AND-OVER DOORS, 550 N, WITH SPYBOX CONTROL UNIT AND 1 FLO2RE TRANSMITTER. RAILS NOT INCLUDED | 48          |

### RAIL FOR SPY:

COMPATIBILITY TABLE AND ALPHABETICAL INDEX

# SPYKIT 650/800

NEW SOLEMYO OPERA

For sectional doors up to 10.5 m<sup>2</sup> (SPY650) and 12.5 m<sup>2</sup> (SPY800), up-and-over doors, including canopy doors, up to 11.5 m<sup>2</sup> (SPY650) and 14 m<sup>2</sup> (SPY800).

24 Vdc irreversible electromechanical gear motor for residential use, **transmission with rack on the rail.**

To be combined with SPYRAIL321, SPYRAIL162 and SPYRAIL081 rails.

**Functional and stylish:** the motor is the only component that moves on the rail, there are no chains or other noisy mechanisms. Ideal for any architectural context.

### Handy

Separate control unit: more practical and convenient for programming and maintenance.

Built-in LED courtesy light. Three practical keys to control the automation.

### Quick to install

Modular rail with assembly accessories. Limit switches easy to position along the rail with no need to stand and work on the ceiling. No chains or other noisy mechanisms to install.

**Simple to install with the BlueBus system,** requiring just two wires for connection between the control unit and the pairs of photocells and other accessories featuring BlueBus technology.

### Easy to program

Simple and fast basic programming, using the Quick Setup procedure. Simplified advanced programming, using 0-View.

**ON/OFF release system:** pulling the release knob once releases the motor; pulling it a second time blocks the motor again, in any position along the rail.

**Inexpensive to run and environmentally-friendly:** when connected to the mains in standby mode, the control unit consumes just 0.5 W. When connected to the battery or the Solemyo kit, power consumption in standby mode is reduced to 0.1 W.

**No blackouts:** operation is guaranteed even when mains power is not available, thanks to the optional PS324 backup battery.

**Safe:** obstacle detection, motor power monitoring during travel, diagnostic messages via flashing light and courtesy light.

Adjustable acceleration and deceleration at the start and end of each manoeuvre.

Ready for installation of the latest generation 8.2 kOhm resistive sensitive edges.

### Optimised logistics

For practical management and transport, the rails are available in different sizes: single 3.2 m long rail, or supplied in two 1.6 m sections plus a 0.8 m extension.

\*To be used in combination with SPYRAIL321 e SPYRAIL162 rails

### DIMENSIONS

### THE KIT CONTAINS:

**SPY650KCE:**  
1 SPY650 GEARMOTOR,  
650 N.

**SPY800KCE:**  
1 SPY800 GEARMOTOR,  
800 N.

**SPYBOXB**  
1 CONTROL UNIT WITH BUILT-IN  
LED COURTESY LIGHT,  
RECEIVER OR OXI CONNECTION.  
OPTIONAL PS324 BACKUP  
BATTERIES.

**FLO2RE**  
1 X 433.92 MHz 2 CHANNEL  
TRANSMITTER.

\*Radio receiver incompatible with Opera system

\*\*ERA ONE remote controls, when used with SPYBOX, work as ERA FLOR models.

## ACCESSORIES

**PS324**  
24 V BATTERY WITH INTEGRATED BATTERY CHARGER. ONLY FOR TN2010L.  
PC/PACK 1

**SPA5**  
OSCILLATING ARM SLIDING ON BEARINGS WITH OPTIMISED STRUCTURE FOR PROJECTING UP-AND-OVER DOORS.  
PC/PACK 1

**SPA6**  
LARGE 585 mm LONG CONNECTING ARM.  
PC/PACK 1

**KI1**  
OUTSIDE RELEASE KIT WITH METAL PULL-CORD AND LOCK AND KEY.  
PCS./PACK 1

**SPA2**  
KIT FOR UNLOCKING FROM THE OUTSIDE WITH CABLE.  
PCS./PACK 1

**IBT4N**  
INTERFACE FOR CONNECTING THE 0-VIEW PROGRAMMING UNIT.  
PCS./PACK 1

**TS**  
SIGNBOARD.  
PCS./PACK 1

**SOLEMYO KIT**  
THE SOLAR POWER TO AUTOMATE GATES, GARAGE DOORS OR BARRIER GATES. SEE PAGE 206

Nice recommends customers order products in pallets in order to facilitate storage and delivery, and ensure packs are uniform. The number of packs per single pallet has been specified for this reason. Approximate draft.

# SPINBUS

SOLEMYO OPERA BLUEBUS 24V

**For sectional doors up to 12.5 m<sup>2</sup> and up-and-over garage doors up to 11.8 m<sup>2</sup>.** Irreversible electromechanical gear motor, for residential use, with belt drive, 24 Vdc motor, with magnetic encoder.

**Complete version of the guide in 3x1 m sections.**

**Rapid installation - anywhere!**

The adjustable head, cord-type release and cable-controlled, step-by-step release can be fitted in any part of the garage in order to actuate the system without a remote control device and without the need to install wall-mounted control units!

THREE-SECTION GUIDE IN GALVANISED STEEL WITH BELT DRIVE SYSTEM, VERY QUIET

BY ROTATING THE "PETAL" WHICH DIFFUSES THE LIGHT (40 W!), USERS ACCESS THE INCORPORATED BLUEBUS CONTROL UNIT

**Guaranteed savings and respect for the environment:**

with the connection to the mains in standby mode the control unit with radio connected consumes just 0.8 W (SPIN30) and 1.2 W (SPIN40); when connected to a battery or to the Solemyo kit, consumption in standby mode is reduced to 0.036 W.

**User-friendly thanks to the BlueBUS system:**

which enables connection by means of just two wires between the control unit and pair of photocells.

**Safe:** obstacle detection system and automatic programming of the working times; motor absorption is monitored during movement, self-diagnosis by means of a flashing light and courtesy light.

Acceleration and deceleration can be adjusted at the beginning and end of each opening and closing manoeuvre.

Can be connected with latest generation sensitive edges 8.2 KOhm.

**Luminous:** 40 W lamp that can be used as garage lightning.

# SPINBUSKIT 20/21/22

BLUEBUS 24V

For sectional doors up to 10.5 m<sup>2</sup>  
and up-and-over garage doors up to 11.8 m<sup>2</sup>.

### Three versions in kit:

- pre-mounted, **guide in three 1-metre sections** SPIN20KCE,
- **with pre-mounted guide of 3 m** SPIN21KCE or **pre-mounted**
- **guide of 4 m (3+1 m)** SPIN22KCE.

### Rapid installation - anywhere!

The adjustable head, cord-type release and cable-controlled, step-by-step release can be fitted in any part of the garage in order to actuate the system without a remote control device and without the need to install wall-mounted control units!

### User-friendly thanks to the BlueBUS system:

which enables connection by means of just two wires between the control unit and pair of photocells.

**Safe:** obstacle detection system and automatic programming of the working times; motor absorption is monitored during movement, self-diagnosis by means of a flashing light and courtesy light.

Acceleration and deceleration can be adjusted at the beginning and end of each opening and closing manoeuvre.

Can be connected with last generation sensitive edges 8.2 KOhm.

Courtesy light: 21 W lamp.

# SPINBUSKIT 23

SOLEMYO OPERA BLUEBUS 24V

For sectional doors up to 10.5 m<sup>2</sup>  
and up-and-over garage doors up to 11.8 m<sup>2</sup>.

With pre-mounted 3-metre guide.

Rapid installation - anywhere!

The adjustable head, cord-type release and cable-controlled, step-by-step release can be fitted in any part of the garage in order to actuate the system without a remote control device and without the need to install wall-mounted control units!

**Guaranteed savings and respect for the environment:** with connection to the mains in standby mode the control unit with radio connected consumes just 5.2 W; when connected to a battery or to the Solemyo kit, consumption on standby is reduced to 0.036 W.

**Safe:** obstacle detection system and automatic programming of the working times; motor absorption is monitored during movement, self-diagnosis by means of a flashing light and courtesy light. Acceleration and deceleration can be adjusted at the beginning and end of each opening and closing manoeuvre. Can be connected with last generation sensitive edges 8.2 KOhm.

**Courtesy light:** 21 W lamp.

**No black out:** operation in the event of a power failure with optional batteries (PS124) housed inside the motor.

COMPATIBILITY TABLE  
AND ALPHABETICAL INDEX

**For projecting and non projecting up-and-over doors up to 9 m<sup>2</sup> (up to 16 m<sup>2</sup> using 2 motors). 24 Vdc electromechanical gear motor.**

**Three versions, standard and upgraded:**

- with built-in control unit, force regulator and absolute encoder (TN2010L);
- with incorporated control unit and receiver, electromechanical limit switch (TN2030L);
- without control unit (TN2020L).

**Reliable and precise:** memorisation of the opening and closing limit switch positions; gradual starting and slowdown during closing.

**Safe:** obstacle detection system and monitoring of the motor absorption during movement, self-diagnosis by means of a flashing light, courtesy light. The latest generation optical and resistive 8.2 KOhm sensitive edges can also be connected.

**Functional:** possibility to connect a second motor without control unit TN2020L, to automate doors up to 16 m<sup>2</sup>.

**TN2030L model with built-in radio receiver compatible with Nice system Flo, FloR and Smilo.**

**TN2010L version with BlueBUS technology and compatible for operation with Solemyo and Opera systems.**

**Advanced:** the absolute encoder technology guarantees precision without the need of a limit switch, reliability and the long term safeguard of the set values.

**Simple:** thanks to the BlueBUS technology which enables connection by means of just two wires between the control unit and photocells.

**Energy saving:** the system enters in stand-by when not in use.

**Practical:** the control unit and PS324 buffer battery (optional) can be connected by means of a simple connector and can be housed directly inside the motor.

Compatible with Nice SMXI and OXI plug-in receivers (optional).

# TENKIT

24V

## For projecting and non projecting up-and-over doors up to 9 m<sup>2</sup>.

Irreversible electromechanical 24 Vdc gear motor.

**Functions:** standard input for photocells and possibility of connecting phototest function in self-learning mode during installation.

**Convenient:** built-in radio board compatible with the systems Nice Flo, FloR e Smilo: possibility of entering up to 150 transmitters.

Push-button programming and automatic position search.

**Adjustments:** 3 force levels, 2 speeds, 3 pause time levels, 3 step-by-step modes.

**Maximum safety:** provision for connection of latest generation 8.2 KOhm sensitive edges.

Obstacle detection and automatic programming of work times, monitoring of motor absorption throughout travel, self-diagnostics via the flashing light and courtesy light. Acceleration and deceleration at the start and end of each manoeuvre.

### UTILISATION LIMITS

N.B. The values indicated above refer to the use of motors with standard accessories.

### DIMENSIONS

### THE KIT CONTAINS:

**TN2030L**  
1 IRREVERSIBLE ELECTROMECHANICAL GEAR MOTOR, WITH INCORPORATED CONTROL UNIT AND PLUG-IN RECEIVER, COURTESY LIGHT AND ELECTROMECHANICAL LIMIT SWITCH, COMPLETE WITH A PAIR OF STANDARD TELESCOPIC ARMS TNA5 AND WITH RELATIVE DRIVING DEVICES TNA38.

**FL02RE**  
1 TRANSMITTER  
433.92 MHz, 2 CHANNELS.

**TS**  
1 SIGNBOARD.

COMPATIBILITY TABLE  
AND ALPHABETICAL INDEX

# SOON

SOLEMYO OPERA BLUEBUS 24V

**For sectional doors\* up to 20 m<sup>2</sup>.**  
24 Vdc electromechanical gear motor  
with absolute encoder.

\*For balanced sectional doors equipped with anti-crash  
(safety device useful in case of spring breaking).

**Easy to install:** Soon can be fitted directly onto the shaft  
of a sectional door; compact, particularly in width, in order  
to make assembly easy in any position.

**User-friendly thanks to the BlueBUS system**  
that enables users to connect the photocell couples  
and control unit using just two wires.

**Practical:** the control unit and PS124 buffer battery (optional)  
can be connected by means of a simple connector and can be  
housed directly inside the motor.

**Energy saving:** when the system is not being used it will  
switch over to standby.

**Reliable and precise:** memorization of limit switch positions  
on opening and closing; gradual starting and slowdown during  
closing; the absolute encoder technology guarantees precision  
without the need of a limit switch, reliability and long term  
safeguard of the set values.

**Safe:** obstacle detection system; motor absorption is monitored  
during movement, self-diagnosis by means of a flashing light  
and courtesy light.

Last generation of 8.2 KOhm optical and sensitive edges can also  
be connected.

# SUMO

24V

## For sectional doors and two-wings sliding doors up to 35 m<sup>2</sup>.

24 Vdc electromechanical gear motor with magnetic encoder, no need to adjust limit switches.

Perfect for intensive use.

**Revolutionary aesthetics:** compact, particularly in width, in order to make assembly easy in any position; quick to install.

**Easy to install:** Sumo can be fitted directly onto the shaft of sectional doors.

Perfect for Ø 25.4 mm shafts and can be used also with Ø 31.75-35-40 mm shafts thanks to the CRA9 adapter.

## Many different functions with the separate Mindy A924 control unit:

- automatic memorization of limit switches on opening and closing;
- gradual departure and slowdown during closing;
- integrated battery charge card with optional battery power supply in the event of power failures easy programming by pressing a single button;
- pause time programming and speed adjustment;
- "service" warning light for maintenance (can be programmed according to the number of manoeuvre required).

CASE TOTALLY MADE FROM THICK DIE-CAST ALUMINIUM

INSPECTION COMPARTMENT, EASY TO ACCESS FOR CONNECTIONS

# HYPP0 7100

SOLEMYO OPERA BLUEBUS 24V 230V

## For 2-leaf folding doors.

Electromechanical gear motor irreversible with telescopic arm, also in 24 Vdc version, with magnetic encoder.

Single model for right and left leaves.

Pre-wired, **incorporated double limit-switch** both during opening and closing; fewer connections mean quicker installation (for HY7100 only).

**Solid metal mechanics.**

**Sturdy, galvanised, telescopic arm.**

### Recommended control units:

for HY7100 Mindy A6F, A60, A700F;  
for HY7124 Moonclever MC824H.

**24 Vdc version** with magnetic encoder.

**Perfect for intensive use**, compatible with the control unit Moonclever MC824H:

- simple programming, by means of a single key;
- self-learning of opening and closing limit positions;
- automatic fault diagnostics;
- programming of pause time;
- pedestrian pass door;
- deceleration on opening and closing;
- obstacle detection with dual technology;
- operation in event of power failure by means of optional rechargeable batteries (PS324);
- Can be connected with latest generation sensitive edges 8.2 KOhm.

COMPACT, SHOCKPROOF  
BODYWORK WITH NO SHARP  
CORNERS

NICE ALUMINIUM RELEASE, DESIGNED  
TO ACCOMMODATE EXTERNAL RELEASE

230V

## For balanced rolling shutters up to 170 kg and 340 kg.

Electromechanical gearmotor available both in reversible and irreversible version.

**High performance:** new irreversible twin-motor version with 800 W power and lifting force up to 340 Nm.

**Unbeatably flexible use and less inventory to keep in stock:** a single model that is designed to take a 76 mm rolling shutter shaft but can be easily adapted to take a 60 or 48 mm shaft, covering the full range of most commonly used sizes.

The outside diameter of the gear can be adapted from 200 mm to 220 or 240 mm, allowing installation on most rolling shutters.

**Technologically innovative:** the brake is built into the gearmotor and results in much smoother operation than the traditional solution.

**For all markets:** 230 and 120V versions available.

### QUICK AND EASY INSTALLATION

**During installation, the motor is supported on the shaft thanks to the practical guided coupling.**

**Easy limit switch adjustment:** automatic limit switch adjustment is achieved by simply operating the rolling shutter without any load, with the motor released, and then just fine-tuning the system manually.

**Simple system for releasing both motors at the same time.**

**Recommended control units:** Mindy A01 and A02.

PRACTICAL: LIMIT SWITCHES FOR BOTH CLOSING AND OPENING, EASY TO ADJUST

VERSATILE: CAN BE USED WITH 76, 60 AND 48 mm SHAFTS

STRONG: 100% ALUMINIUM HOUSING

# RONDO

230V

**For balanced rolling doors up to 130 kg and 180 kg.**  
Electromechanical gearmotor available both in reversible and irreversible version.

**Smart:** the limit switch unit and wiring are protected by an elegant box; pre-wired capacitor.

**Fast:** easy and intuitive adjustment of the limit switches both during opening and closing.

**Complete:** supplied with 200 mm and 220 mm flange for 60 mm shafts, with 48 mm and 42 mm adaptors.

**Easy to install:** thanks to the guided connector, you don't need to hold the motor while you secure it using just 3 screws.

**Recommended control units:**

Mindy A01 and A02, - easy to use, complete and reliable, featuring:

- semi-automatic or automatic operation;
- complete reverse run with photocell;
- step-by-step operation;
- programmable Step-by-step/Open input;
- programmable Stop/Photo input;
- input for resistive edge;
- incorporated radio card, compatible with the Nice Flo, FloR and Smilo systems.

COMPLETE: DESIGNED FOR CORDOPERATED RELEASE

STURDY: HOUSING IN 100% ALUMINIUM

PRACTICAL: EASY TO ADJUST, ELECTROMECHANICAL LIMIT SWITCHES BOTH DURING CLOSING AND OPENING

# SIMPLE SOLUTIONS FOR COMPLEX INSTALLATIONS

Nice offers simple safe solutions to manage a large number of automations, lighting points and electrical loads.

## MANAGING A "GROUP"

Era Screen transmitters can be used to control single automations, automation groups and multigroups.

To connect a group of similar automations (gate only, awnings only) to a single key, during programming all the automations you want to activate together must be associated with that key.

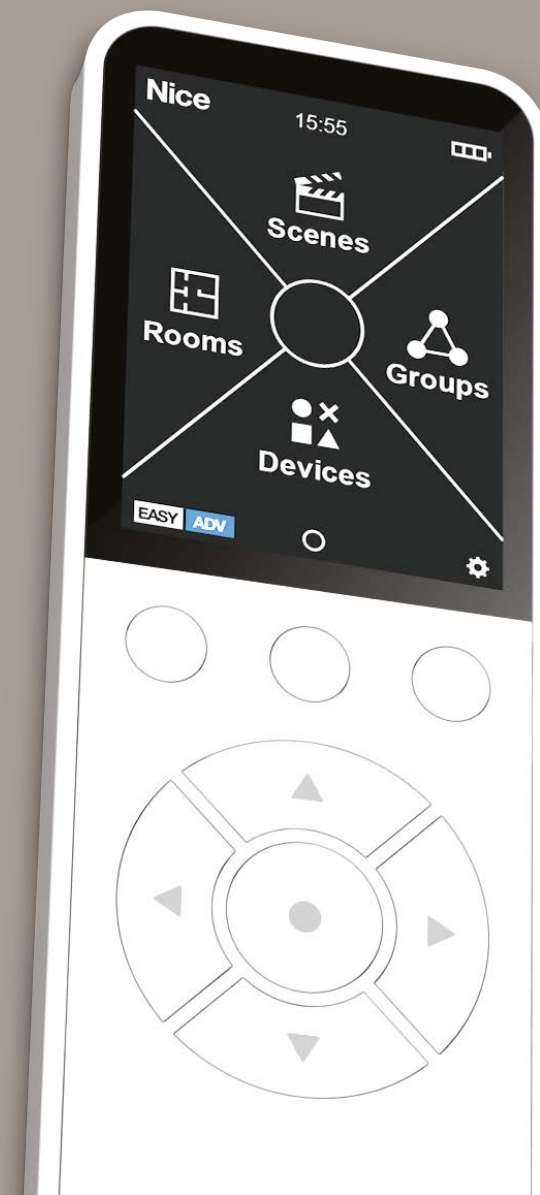

## MANAGING MULTIGROUPS

With 6-channel transmitters, groups of different automations (awnings and rolling shutters) can also be created. These are known as "multigroups".

## INTEGRATION WITH OTHER SYSTEMS

As well as automation, transmitters in the Era line can also be used to manage outdoor lighting.

For example, if you connect the outdoor lights (for a maximum power of 1000 W/500 VA) to a receiver and a TT2L control unit, you can select one of the keys on the transmitter to control all of them together.

**LEGEND**

- 1. SINGLE AUTOMATION - AWNING
- 2. SINGLE AUTOMATION - AWNING
- 3. GROUP AUTOMATION - SOLAR SCREEN
- 4. SINGLE AUTOMATION - GARAGE DOOR
- 5. SINGLE AUTOMATION - GATE
- 6. GROUP - OUTDOOR LIGHTING

# ERA P VIEW

**Multifunction radio transmitter with intuitive graphic interface, LCD colour screen (2.2") navigation by 5-key joypad.**

To manage up to 99 devices singularly or in groups (20 zones, groups or scenarios).

With clock and calendar to configure timed commands.

**Advanced programming for professionals!**

The installer can access the transmitter and receiver programming and modify and create types and sets of commands. Direct access from first start-up by inserting the batteries or subsequently using the keys on the back of the transmitter.

**Easy to use for all requirements:** can be used in either simple or advanced mode.

## Advanced Users

Can modify the transmitter settings and the labels identifying the devices and create, time, modify and control zones, groups and scenarios. They can also limit access to the advanced menu by a numerical password.

## Easy Users

Can simply and directly control a small number of devices pre-authorized by the advanced user. They can consult the dashboard and suspend timed events.

## Practical and functional.

If not used for a few seconds, Era P View switches to stand-by to reduce battery consumption. Thanks to the built-in sensors, the device comes on again automatically when removed from the wall support or moved, or if any key is pressed.

**USB socket:** to recharge the batteries (if rechargeable).

With practical magnetic support for fixing to the wall.

| CODE       | DESCRIPTION  | PCS./PACK. |

# ERA TOUCH

## Touchscreen to control Nice automations and manage the NiceHome alarm system

The wireless Nice Era touchscreen can manage all home automations, thanks to remote control of:

- a maximum of 99 single controls,
- up to 10 groups of controls, to manage a number of automations of the same type simultaneously;
- up to 10 single scenarios, to manage different automations, including those associated with the alarm system.

By using Nice TT2L or TT2D miniaturised control units and/or universal receivers (es. SMX2R etc.) you can manage light, irrigation and heating (convector heaters, etc.).

Automations, groups and scenarios can be controlled in time bands thanks to the built-in weekly and hourly programmer.

Simple programming, configuration and control of the alarm system, with intuitive graphic display, built-in vocal guide and bidirectional technology.

**Built-in proximity transponder badge reader for the management of alarm system:** each individual key can be personalised for the single user and individual zones.

Thanks to the bidirectional wireless communication with the alarm system, the touchscreen displays alarm system status, indicating the status of each individual zone by means of simple icons.

### Main functions:

- Management of Nice automations with FLOR encoding: it can control up to 99 single automations divided into sun screens, gates, garages and lighting.
- Simultaneous management of the controls for blinds, shutters and sun screens automated with Nice tubular motors.
- Control of single automations, groups of automations and the execution of scenarios, with the possibility of attributing a name to each automation.
- Management of timed controls through the built-in weekly and hourly programmer.
- Four programmable buttons to control automations and/or groups and/or scenarios.
- Scenarios combined with event notifications enable the garden lights to be turned on and/or the shutters to be closed in the event of an alarm in the garden.
- Easy to update thanks to the mini-USB connector.

# ERA INTI

The colourful line of 1 and 2 channel miniaturised transmitters, available in six colours.

433.92 MHz rolling code, with management of Identity Codes and Certificates, self-learning and built-in proximity receiver; with 72 bit O-Code encoding, also compatible with receivers with Nice FLOR encoding.

**Evolved:** uses data processing and recognition systems that increase its degree of security and deliver a threefold reduction in automation response times.

**Easy memorisation, even at a distance,** thanks to Opera receivers.

There are two options for enabling a new Inti transmitter, **even at a distance from the system:**

- using a transmitter already programmed in the receiver, thanks to the enabling **Code exchange** between the two (figure 1);
- using the Nice O-Box connection interface; the receiver's **Certificate** is entered by just placing the new Inti next to the O-Box and following the guided procedure on a PC or PDA (figure 2).

**Safe,** if a transmitter is stolen or lost, with the O-Box the user can:

- **replace it,** maintaining the same functions as in the previous one, **disable** the old transmitter by increasing the priority level on the new Inti.

Inti can be used as keyring thanks to the lace included in the pack.

**INTIKIT**  
THE KIT CONTAINS:  
3 TWO-CHANNEL INTI UNITS  
(COLOURS RED, GREEN AND BLUE)  
1 OX2 RECEIVER.

## UNINTIVERSAL!

**Inti, the universal control!  
Ideal for use in apartment  
blocks or multi-user systems.**

Easy and cheap to install: combined with the OX2 universal receiver, the Inti transmitter is able to control and manage any automation, including pre-installed systems.

1. CODE EXCHANGE BETWEEN A MEMORIZED TRANSMITTER AND A NEW ONE, TO BE MEMORIZED.

2. POSSIBLE MEMORISATION USING NICE O-BOX AND THE "CERTIFICATE"

3. THE PRESENCE OF A "TRANSMITTER" IN THE OX1T, OX2T AND OX4T RECEIVERS ALLOWS RADIO CODES TO BE ACCESSED BY MEANS OF THE O-BOX MULTIFUNCTION INTERFACE.

4. OX1T, OX2T AND OX4T RECEIVERS CAN BE USED AS SIGNAL REPEATERS.

# ERA ONE

The system includes 1, 2, 4 and 9 channel transmitters and prewired receivers with connector, with and without built-in transmitter.

433.92 MHz rolling code, with management of Identity Codes and Certificates, self-learning and built-in proximity receiver; with 72 bit O-Code encoding, also compatible with receivers with Nice FLOR encoding.

Available in versions with multiple input sequential encoding (Era OneC).

**Evolved:** uses data processing and recognition systems that increase its degree of security and deliver a threefold reduction in automation response times.

**Easy memorisation, even at a distance,** thanks to Opera receivers.

There are two options for enabling a new transmitter, even at a distance from the system:

- using a transmitter already programmed in the receiver, thanks to the enabling **Code exchange** between the two (figure 1);
- using the Nice O-Box connection interface; the receiver's **Certificate** is entered by just placing the new Era One next to the O-Box and following the guided procedure on a PC or PDA (figure 2).

**Safe,** if a transmitter is stolen or lost, with the O-Box the user can:

- **replace it,** maintaining the same functions as in the previous one, **disable** the old transmitter by increasing the priority level on the new Era One.

**Extremely practical:** using the O-Box software, the Era OneC version allows whole packs of 10 devices to be programmed in a single procedure, without even opening them!

**Elegant and convenient:** the Era One transmitter can be used as a stylish, high-tech keyring or fixed to the wall or your car's dashboard with the handy support included in the pack.

**Era OneFM, ideal for use in cities or places where many devices are present.**

868.46 MHz Rolling Code transmitter line, using frequency modulation (FM), less sensitive to interference than amplitude modulation AM.

\* Transmitter range and receiver reception capacity may be affected by any devices operating on the same frequency in the area.

1. CODE EXCHANGE BETWEEN A MEMORIZED TRANSMITTER AND A NEW ONE, TO BE MEMORIZED.

2. POSSIBLE MEMORISATION USING NICE O-BOX AND THE "CERTIFICATE".

# ERA FLOR

## 1, 2 and 4 channel transmitters with a new stylish design.

### 433.92 MHz rolling code system with self-learning function.

Also available in versions with multiple input sequential encoding (Era FlorCE).

**Absolute security:** rolling code transmission makes the transmitter impossible to clone.

**Ideal solution for the management of multi-user apartment block systems** thanks to the unique, personal code.

**Easy duplication of new transmitter close to the system** by using an authorised transmitter or directly using a key on the receiver, while a LED displays the various functions.

**Extremely practical:** using the O-Box programming unit, the Era Flor-CE version allows whole packs of 100 devices to be programmed in a single procedure, without even opening them.

The O-Box and dedicated software applications for PC and PDA allow:

- **quick, user-friendly programming** of receivers and transmitters;
- **management and printout of code list;**
- **creation of individual installation databases** (useful in multi-user systems).

### Optimal autonomy and low consumption.

**Elegant and convenient:** the Era Flor transmitter can be used as a stylish, high-tech keyring or fixed to the wall or your car's dashboard with the handy support included in the pack.

**Total compatibility** with previous Flor series receivers (universal, universal modular and with Nice or SM connector) and with the One receivers (OX1/OXIT, OX2/OX2T and OX4T).

# NICEWAY

## Modular control system

to manage the range of Nice automations from any point within the home.

### Modular

The NiceWay system is based on a number of transmitter modules that can be placed in five different holder models to create a flexible range of made-to-measure solutions.

Although the modules, available from 1 to 80 groups or 240 channels, are very small in size, they are extremely easy to operate.

### Advanced and compatible

Frequency of 433.92 MHz, 52 Bit Rolling Code with (over 4.5 million of billion combinations); self-learning function.

Compatible with the 433.92 MHz Nice Ergo, Plano, FloR and VeryVR systems (Flo and Smilo with WM240C and WM080G).

Estimated range: 200 m in a free field, 35 m indoors.

Extended battery life (3 V lithium battery).

### All the NiceWay solutions

The 240 channel module with display, which controls 80 groups and 70 multi-groups, is ideal for the management of sophisticated systems. All the awnings, roller shutters and gates, as well as the office, home and hotel irrigation and lighting systems in just 14 g and 16 cm<sup>2</sup>!

### Made-to-measure

To protect the electronic parts from dirt and damp, the rubber function buttons are incorporated in the actual body of the control modules.

NiceWay can be used anywhere in the home, in the garage, the living room, the kitchen as well as the bathroom.

### Professional

For a more professional and practical use, the system can be programmed by means of the handy Nice palmtops.

# STONE

## NiceWay - Stone Portable and table-top supports.

### Fetching and practical

With Stone the radio control device becomes even more functional and catching.

In shock-proof rubber to completely protect the transmitting module, fully directional for greater reception, Stone is available in neutral or bright colours so as to perfectly blend into modern or elegant homes.

### Comfortable anywhere

Resistant to the most violent of shocks and garden humidity, Stone is always easy to find, be it on the living room or office coffee table, on the kitchen worktop, in the bathroom or on the side of the pool.

# ONDO

## NiceWay - Ondo Portable, wall mounted and table-top supports.

### Portable, from table to wall

Ondo is the versatile NiceWay line support; the wall support with its simple magnetic fixing system, transforms Ondo from a comfortable portable transmitter to an inconspicuous wall plate.

Ondo, made in a shiny dirt-resistant plastic, has a rubber lower section to improve grip and prevent slipping when used on surfaces.

The transmitter module can be inserted so that Ondo can be used both in width and in length to increase the personalisation possibilities.

# OPLA

## NiceWay Wall plaques.

### Elegant, discreet and functional

Extremely slim - as is the plate itself - the transmitter inserted into the Opla wall plate permits to inconspicuously and fetchingly add additional control points without having to perform any building operations.

The NiceWay Opla wall plates are available in the square Opla-S version and the rectangular Opla-R version and in many different colours.

# GO

## NiceWay Mini cover.

### Go Nice!

Snugly in the pocket!

Every NiceWay transmitter really becomes portable with the Go support: the maximum performance to manage up to 240 channels from anywhere and with the maximum compactness.

Made of shock-proof rubber, in different and exclusive colours, Go protects the module from the most severe of knocks.

Go can be hung anywhere and can also be used as a key-ring thanks to the tie that is included in the pack.

# RECEIVERS

## ERA INTI, ONE, FLOR, NICEWAY

### The complete line of receivers with Opera system functions, suitable for all installation requirements:

- **with connector**, compatible with latest-generation Nice control units with SM port;
- **universal prewired**, for use with all types of control unit, for the control of any automation, lighting or irrigation system or other electric circuits.

**Maximum flexibility:**  
up to 1024 transmitters can be memorised.

**Convenient and practical:**  
the inclusion of a transmitter in the OXIT/OXITFM, OX2T/OX2TFM and OX4T receivers allows radio codes to be accessed by means of the O-Box multifunction interface even when in inaccessible positions (figure 3).

OXIT/OXITFM, OX2T/OX2TFM and OX4T receivers can be used as signal repeaters to increase the operating distance between transmitters and other One series receivers (figure 4).

**Secure use**, thanks to the 3 password-protected levels.

**The O-Box** and dedicated software applications for PC and PDA allow:

- **quick, user-friendly programming** of receivers and transmitters;
- **management and printout of code list**;
- creation of **individual installation databases** (useful in multi-user systems).

### SM plug-in receiver with Flor system functions, step-by-step and anti-burglar functions.

**Management of multi-user system** through the unique, personal code: the recognition receivers can receive and memorise up to 255 codes.

**Memorisation:** a particular receiver output can be associated to each transmitter key (e.g. key 3 TX= output 1 RX).

| <b>0BOX2</b>  | DUAL BAND INTERFACE, FOR 433.92/868.46 MHz DEVICES, COMPLETE WITH SOFTWARE, SUPPLIED WITH USB CONNECTION CABLE.                      | 1        |
| <b>0BOX2B</b> | DUAL BAND INTERFACE, FOR 433.92/868.46 MHz DEVICES, COMPLETE WITH SOFTWARE, WITH USB CONNECTION CABLE AND BUILT-IN BLUETOOTH MODULE. | 1        |

**0-BOX**

1. CODE EXCHANGE BETWEEN A MEMORIZED TRANSMITTER AND A NEW ONE, TO BE MEMORIZED.

2. POSSIBLE MEMORISATION USING NICE O-BOX AND THE "CERTIFICATE".

3. THE PRESENCE OF A "TRANSMITTER" IN THE OXIT, OX2T AND OX4T RECEIVERS ALLOWS RADIO CODES TO BE ACCESSED BY MEANS OF THE O-BOX MULTIFUNCTION INTERFACE.

4. OXIT, OX2T AND OX4T RECEIVERS CAN BE USED AS SIGNAL REPEATERS.

# OPERA

## Opera Control, advanced management of automation systems also at a distance.

The innovative Opera system enables the installer to manage, program and control automation systems, also remotely, simply and safely, with significant savings in time.

The **Opera** system comprises transmitters and **One** series receivers, the O-Box connection interface and the communication **software "O-View Software Suite"** and **"O-Box Software Suite"**.

All components communicate via **BUS T4** or the new **O-Code** Rolling Code system, making transmissions safer and reducing automation response times.

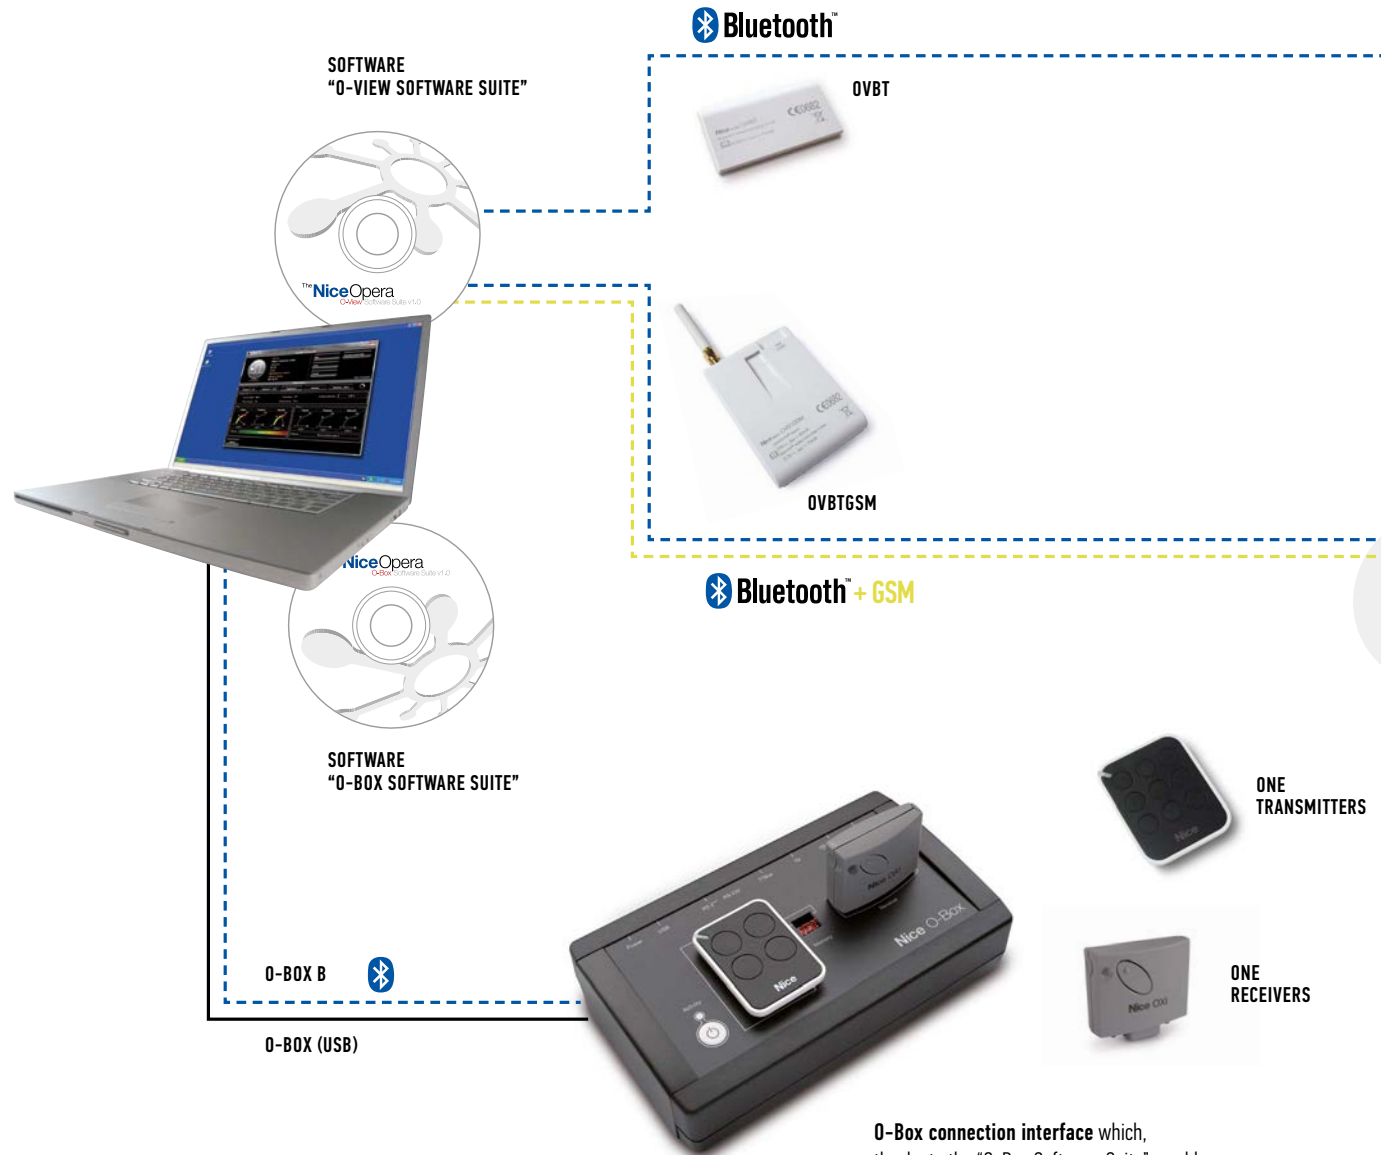

**Nice Opera** simplifies the installer's work, making for easier programming, and enabling access to all control panel parameters to adapt the system to all requirements. No specific procedures needed for each product: single programming mode with intuitive menus, with no need to consult instructions.

### Constantly efficient assistance for all customers:

Simplifies system programming by means of the O-View multifunction display which when connected directly to the control panels compatible with the Opera system via BUS T4, enables full access to the system functions, for practical, rapid and advanced programming.

**BUS T4** is the innovative communication protocol that enables you to create extensive networks of compatible automation systems, managing them from a single point via O-View.

Device management can be protected by two password levels. By interfacing the system with the PC, you can control a complex automation system such as those found in densely frequented buildings (hospitals, hotels, companies, etc.).

**O-Box connection interface** which, thanks to the "O-Box Software Suite", enables the configuration and programming of all Nice control devices, from the PC or PDA.

# O-VIEW

OPERA

**Unit for control, programming and diagnostics for devices equipped with BUS T4 connection, on site or remotely via GPRS thanks to the connection with your PDA, Smartphone or PC.**

**Advanced management:** O-View is connected directly to the compatible control unit via a BUS T4 cable (supplied). By connecting O-View permanently to a control unit or group of control units via BUS T4, a network can be created for local or remote centralised management.

**Simple programming mode** with intuitive menus valid for each product, with no need to consult the specific instructions.

O-View powers up and automatically recognises all devices on the network as soon as it is connected, displaying only the specific parameters of the device on which to intervene.

In the case of several devices on the network the BUS T4 address is identifiable by means of a text label personalised as required, enabling rapid recognition of the associated device.

**Programmable:** thanks to the built-in clock, it is also possible (with integrated backup battery) to program delivery of commands at a set time, for example to automate opening and closing of complex industrial and commercial systems or for the creation of "scenarios".

A practical wall-mounted support supplied.

**Safe:** two password-protected levels (for the user and the installer).

**Practical:** O-View is your portable office, and can be connected just when programming or for maintenance, or can be installed permanently on site to exploit all the benefits of local or remote centralised management.

## ACCESSORIES

| CODE        | DESCRIPTION   | PC./PACK |
|-------------|---|----------|
| <b>OVA1</b> | CLAMP FOR FITTING CONNECTORS RJ14   | 1        |
| <b>OVA2</b> | CONNECTORS RJ14, TYPE 6/4, FOR FLAT 4-WIRE CABLE                              | 5        |
| <b>OVA3</b> | RJ14 SPLITTERS, TYPE 6/4, FOR CASCADE CONNECTION OF DEVICES ON BUS T4 NETWORK | 5        |
| <b>OVA4</b> | FLAT 4-WIRE CABLE FOR CONNECTION OF DEVICES ON BUS T4 NETWORK, LENGTH 100 m   | 1        |

**OVBT**  
**Bluetooth connection module for O-View interface.**  
 "O-View Software Suite" enables connection via PC or PDA to O-View in the vicinity of the system, to intervene on the control units on the BUS T4 network. Maximum connection distance 15 m.

**O-VIEW SOFTWARE SUITE**

This application, supplied with OVBT and OVBTGSM, as well as expanding the functions of O-View enables the creation of a database of installations with personal data of clients and configurations of each system, even on more complex versions.

There are two versions of software: "O-View Desktop" designed for installation on a PC and "O-View Mobile" which enables use of the functions of the desktop version on a smaller screen of a PDA or Smartphone.

**By connecting to the site [www.nice-service.com](http://www.nice-service.com) users can download the constantly updated firmware and software versions.**

The interface of "O-View Software Suite" has been specially designed to enable rapid access to all parameters of the connected devices without the need for physical access, as well as quick diagnostics of malfunctions by consulting the event log, all the most practical and intuitive way possible.

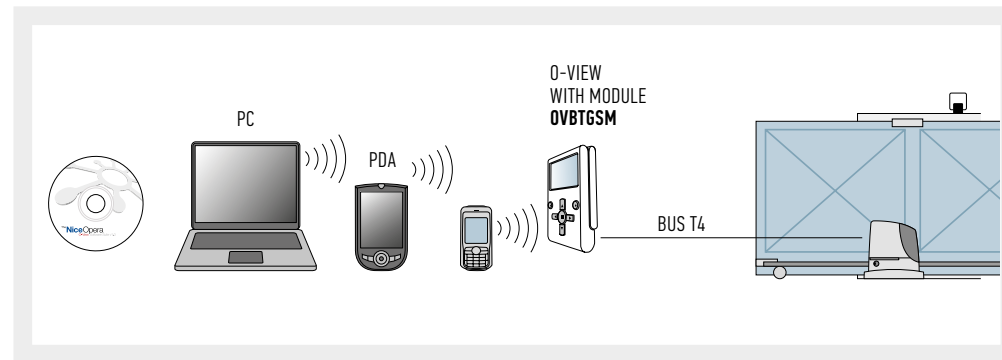

The O-View control function has been expanded: in just one PC screen, all applications connected via BUS T4 can be controlled.

**Minimum requirements**

- O-View Mobile version for PDA palmtop:**
- Processor: (300 MHz) Recommended by Nice: (> 300 MHz)
  - RAM: 64 MB Recommended by Nice: 128 MB
  - Storage memory: 5 MB Recommended by Nice: 20 MB
  - Operating system: Windows® Mobile 2003 Recommended by Nice: Windows® 5.0
  - Connection: Bluetooth®
  - Graphics resolution: 240 x 320, 256 colours
  - PC with: CD-Rom (required for software installation on palmtop).

- O-View Desktop version for PC:**
- Processor: type AMD®/Intel® (500 MHz) Recommended by Nice: type AMD®/Intel® (1 GHz)
  - RAM: 128 MB Recommended by Nice: 256 MB
  - Free space on disk: 280 MB Recommended by Nice: 512 MB
  - Operating system: Windows® 98 SE or later Recommended by Nice: Windows® 2000 or later up to Win 7
  - Connection: Bluetooth®
  - Graphics resolution: 800 x 600, 256 colours
  - Disk drive: CD-Rom (required for installation).

Note – software installation includes installation of the program Microsoft® .NET Framework Redistributable 2.0.

**OVBTGSM**  
 In addition to the benefits of the OVBT module, the automation or network of automations can now be **controlled via GSM** by connecting O-View to the system via BUS T4.

A GPRS connection also enables connection via the Internet to O-View to obtain all management functions offered by the software from any location with no need for presence on site.

The user can remotely control the automation via GSM, from any of the enabled numbers, and check status, such as opening a gate by means of a phone call or by sending 4 different controls via SMS text message, with the security offered by entry of a unique password.

**INB, the Nice control interface** that enables communication between the systems Nice Bus (TTBus and BusT4) and MyHome of BTicino (SCS).

| CODE | DESCRIPTION  | PC/PACK |
|------|--|---------|
| INB  | COMMUNICATION INTERFACE BETWEEN BTICINO BUS (SCS) AND NICE BUS (TTBUS AND BUST4) | 1       |

**TECHNICAL SPECIFICATIONS**

|     | Power supply   | Consumption   | Insulation | Protection rating (IP) | Working temp. (°C Min. Max) | Dimensions (mm) |
|-----|--|---------------|------------|------------------------|-----------------------------|-----------------|
| INB | to BusT4, or 24 Vac/dc (limits 20 ÷ 35 Vdc, 22 ÷ 35 Vac) | approx. 18 mA | class III  | 20                     | -20-50 °C                   | 41x52x18h       |

# O-BOX

OPERA

**O-Box is the multi-function interface** which, thanks to the dedicated software "**O-Box Software Suite**", enables **the configuration and programming directly from the PC or PDA**, practically and intuitively, **all transmitters, receivers and other Nice control devices.**

### The convenience of remote control:

O-Box enables a number of tasks to be performed directly from the office, **without the need to visit the client's system.** For example the operator can program the functions and parameters of transmitters with the utmost of ease, and send them already configured and operative to the clients.

### It is also possible to:

- program transmitters in the One series via radio;
- manage all functions via radio of the receivers in the One series fitted with built-in transmitter;
- read and write transponder badges in the Moon series;
- receive data via radio from transmitters in the series Smilo, VeryVE, Flo, VeryVR, FloR, One, Niceway or via optical reader for transmitters in the Bio series;
- program receivers in the series Smilo, Bio, FloR and One and memories of the control devices MOMB, MOTB and MORX;
- create and manage an updated database with personal data of clients and configurations of the receivers installed in the respective systems.

O-Box interfaces with your PC or PDA palmtop, performing the control, entry, deletion, enabling or disabling of codes, programming of the memory, functions and typical parameters of the receivers, transmitters and other Nice control devices.

### The software "O-Box Software Suite"

can be installed quickly and easily either on PC (O-Box Desktop version) or on PDA palmtop (O-Box Mobile version).

**Universal:** O-Box manages all programming procedures possible by means of BUPC.

It also enables import of databases previously created using the software for BUPC.

### NOTE ON CABLA ACCESSORIES:

O-Box is only supplied with the USB cable; all other cables are optional and are not supplied in the pack.

### Minimum software installation requirements

#### O-Box Mobile version for PDA palmtop:

- Processor: (300 MHz) Recommended by Nice: (> 300 MHz)
- RAM: 64 MB Recommended by Nice: 128 MB
- Storage memory: 5 MB Recommended by Nice: 20 MB
- Operating system: Windows® Mobile 2003 Recommended by Nice: Windows® 5.0
- Connection: Bluetooth®
- Graphics resolution: 240 x 320, 256 colours
- PC with: CD-Rom (required for software installation on palmtop).

#### O-Box Desktop version for PC:

- Processor: type AMD®/Intel® (500 MHz) Recommended by Nice: type AMD®/Intel® (1 GHz)
- RAM: 128 MB Recommended by Nice: 256 MB
- Free space on disk: 280 MB Recommended by Nice: 512 MB
- Operating system: Windows® 98 SE or later Recommended by Nice: Windows® 2000 or later up to Win 9
- Connection: Bluetooth®
- Graphics resolution: 800 x 600, 256 colours
- Disk drive: CD-Rom (required for installation).

Note - software installation includes installation of the program Microsoft® .NET Framework Redistributable 2.0.

# OX4T

OPERA

## Universal 4-channel receiver in the One series, with built-in transmitter.

For remote control of any automation on gates, garage doors, road barriers, shutters, awnings, venetian blinds, irrigation and lighting systems or other electrical circuits.

## Equipped with BUS T4 connector for connection to O-View.

### An extended system:

OX4T manages 4 outputs controlled by 4 relays, usable as power relays or voltage-free contacts, to extend use of the Opera system also to devices with specific provisions.

Thanks to the internal transmitter, OX4T can be used as a repeater, thereby increasing the operating range between transmitters and other receivers in the One series.

### Practical and functional:

OX4T can be connected via radio to the interface O-Box and via BUS T4 to the multifunction display O-View, to enable programming, diagnostics, timed functions and management of codes, also remotely by means of the modules OVBT and OVBTGSM.

### 2 programming modes:

"Mode I" and the new "extended Mode II" which enables expansion of the number of controls to up to 14.

**Multicode:** OX4T is also compatible with the transmitters with encoding system O-code, Smilo, Flo, FloR, FloR and TTS.

OX4T is fitted with removable terminals to facilitate connections and a generously sized memory to enable storage of up to 1024 transmitters, with the option for password protection.

# TAG SYSTEM

## Ideal for restorations and upgrades of existing systems.

The Tag system, disappearing inside standard wall mounted plates and suitable to confined spaces, are ideal for restorations and upgrades of existing systems to control home automations, lighting points and all loads up to 500 W not directly accessible from cable controls.

All without the need to replace the existing system or involve building work!

1. **TTX4: recessed transmitter** with mains power supply. Ideal for the control of automations not directly accessible from cable controls.
2. **TT2N: miniaturised control unit** for control of a 230 Vac motor up to 500 W, with built-in radio receiver.
3. **TT2L: miniaturised control unit** for control of lighting systems, with built-in radio receiver.
4. **TT2D: miniaturised control unit** for control of lighting systems from multiple points, with built-in radio receiver and switch.

### Invisible, but highly effective

Since miniaturised control units are incorporated invisibly into ordinary wall plates, they allow quick and easy installation and unbeatable safe, precise connection with all system components. Extremely compact size.

### Perfect for every home

Ideal in renovation projects and when upgrading existing systems to control home automations, all with no need to replace the existing system or do any building works! What could be more discreet? It's Nice!

### Comfort and simplicity always

Tag system coupled to the transmitter range. With just a simple touch, NiceWay module allows the wireless control of awnings and shutters, automation, irrigation and lighting systems and all loads up to 1,000W/500 VA not accessible by cable and, what's more, offers the option of wire connecting the miniaturized control unit to the existing wall switch in order to get an additional control point.

## TTX4, TTXB4

TTX4, with mains power supply and TTXB4, with long battery life power.

Optional connection of up to 4 pushbuttons for cable control of automations.

### Recessed transmitter ideal for the control of automations not directly accessible from cable controls.

433.92 MHz frequency, with 52 bit rolling code (over 4.5 million of billion combinations).

# TT2

**Mindy TT miniaturised control units**, totally compatible with the Nice transmitters in the series Era, NiceWay, Flo, Very, Planotime, FloR and Smilo.

**Maximum flexibility:** can memorise up to 30 transmitters in Mode I and Mode II.

**Fast programming** thanks to the programming button. An indicator LED helps the user to follow the correct programming procedure, for example signalling when the set thresholds of the climatic sensor are exceeded.

**Possibility of connection** to climatic sensors Nemo and Volo S-Radio.

**IP20 protection level.**

**TT2N, control unit for 230 Vac motor up to 500 W, with built-in radio receiver.**

Possibility of connecting a pushbutton for cable control in mode STEP-BY-STEP - ALWAYS UP - ALWAYS DOWN.

TT2N

Possibility of memorizing radio controls in Mode I: UP - STOP - DOWN - "HOLD-TO-RUN" DOWN  
Mode II: STEP-BY-STEP - UP STOP - DOWN STOP - STOP - "HOLD-TO-RUN" DOWN - "HOLD-TO-RUN" UP.

**TT2L, control unit for lighting systems, with built-in radio receiver.**

For the control of 230 Vac mains voltage loads with power up to 1000 W / 500 VA.

Simplified connections thanks to the switch connected directly to the power mains (not for TT2D).

Possibility of connecting a switch for cable control in ON/OFF mode.

Possibility of memorizing radio controls in Mode I: ON - OFF  
Mode II: ON/OFF - HOLD TO RUN - TIMER1 - TIMER2.

Connection to climatic sensor Volo S-Radio enables management of light activation and shutdown by means of the "Sun" sensor.

Programmable timer from a minimum of 0.5" to a maximum of approx. 9 hours; optimised programming procedure, maintaining set values also in the event of a power failure.

**TT2D, control unit for lighting systems from multiple points, with built-in radio receiver and switch.**

Same characteristics as TT2L.

TT2L

TT2D

# TT1

## Mindy TT1 miniaturised control units with pass-through installation, IP55 protection,

With radio-controls 433.92 MHz receiver with over 4.5 million billion combinations.

Self-recognition of the transmitters of the Era, NiceWay, Flo, Very, Planotime, FloR and Smilo series.

### TT1N for awnings and rolling-shutters.

For motors max. 500 W.

Total flexibility of motor control with 2 transmitter memorisation modes

Mode I: UP - STOP - DOWN

Mode II: STEP-BY-STEP - ASCENT ONLY - DESCENT ONLY - STOP.

Memorizes up to 30 transmitters.

Internal terminal board for connection.

Manages the new climatic sensors Nemo and Volo S-Radio for synchronised controls.

The work time can be programmed from a minimum of 4" to a maximum of 4'.

### TT1L for lighting systems, irrigation pumps, etc...

For controlling loads with a mains voltage of 230 Vac and power max 500 W.

Memorizes up to 30 transmitters.

Internal terminal board for connection.

Manages up to 2 timers for automatic switch off.

Maximum control versatility with 2 transmitter memorisation modes

Mode I: ON - OFF with separate buttons

Mode II: ON - OFF - MAN PRESENT - TIMER.

Timer can be programmed from a minimum of 0.5" to a maximum of approximately 9'.

# NICE ERA PHOTOCELLS, SELECTORS & PROXIMITY READER

The new Nice generation of optical devices for automation safety, available with Nice BlueBUS technology for a simplified installation.

Three different sizes of photocells synchronized to meet any need and complete the safety and comfort of every automation system, also in the tightest spaces, perfect for use with renovations to cover annoying existing set-ups.

## > SLIM

With only 30 mm width, also in burglar-proof version, ideal for tight spaces.

## > MEDIUM

In burglar-proof and positionable versions, ideal for the most popular systems.

## > LARGE

Positionable, also in versions for recessed mounting with 9 mm projection, ideal for concealed installations.

## > ERA KEYPAD

Extremely strong metal body, 27 millimetres depth and only 13 mm from the wall for the recessed mounting version.

### DIGITAL SELECTOR WIRELESS (EDSWG)

Digital selector in burglar-resistant version 13 keys.

### DIGITAL SELECTORS (EDS)

Digital selector in burglar-resistant version for outdoor and recessed installation.

## > ERA KEY

Wafer thin, only 13 millimetres depth from the wall in the recessed versions.

### KEY SELECTORS WITH EUROPEAN CYLINDER (EKSU)

Key selectors in version for outdoor or recessed mounting.

### KEY SELECTORS WITH STANDARD CYLINDER (EKS)

Key selectors in version for outdoor or recessed mounting.

## > ERA TRANSPONDER READER

Transponder proximity reader for cards and badges with customized programming.

### PROXIMITY READERS (ETP)

Proximity readers for card and badge reading.

### TRANSPONDER BADGE

Convenient transponder badge with a practical through hole to add the key chain on.

# ERA PHOTOCELL S

BLUEBUS

**Fixed, synchronized photocells Slim, also with Nice BlueBUS technology.**

**Safe:**

D type device according to specification EN12453 which allows to pick-up obstacles on the optical axis between transmitter (TX) and receiver (RX).

Using the fototest function it is possible to achieve class 2 safety fault according to specification EN 954-1.

**Cutting-edge technologies:**

antiglare circuit which eliminates possible sunlight interference.

EPS  
EPSB

EPSA  
EPSAB

**Practical:**

8° angle of reception.

**Resistant and vandal-proof:**

ABS body resistant to weather conditions, available also in burglar-resistant version with metal shell.

**Nice BlueBUS technology:**

available with the BlueBUS system, which allows an easy connection to the control unit of all devices with only two wires, by simply connecting them in parallel and selecting the jumpers for addressing according to the needed function.

The system acquires automatically the devices connected to the BlueBus network.

Automatic synchronization between multiple photocell pairs in order to avoid other possible interferences between the devices.

**IB interface:**

allows the connection of proximity readers with Nice BlueBUS technology to control units having terminals for traditional contacts.

**PHOTOCELLS**

BLUEBUS

**Synchronized photocells Large, fixed or positionable, also with Nice BlueBUS technology, both surface mounted and recessed.**

**Easy and versatile:**

recessed versions EPLIO compatible with the most popular standards on the market to replace the old photocells or cover annoying existing setups without the need of extra adaptors.

**Safe:**

D type device according to specification EN12453 which allows to pick-up obstacles on the optical axis between transmitter (TX) and receiver (RX).

Using the fototest function it is possible to achieve class 2 safety fault according to specification EN 954-1.

The models EPL, EPL0, EPLIO provide for 2 range levels.

**Cutting-edge technologies:**

antiglare circuit which eliminates possible sunlight interference.

The positionable versions allow for the compensation of centering gaps up to 30°.

**Discreet:**

polycarbonate body, extremely strong with minimal projection of 9 millimetres from the wall for the recessed mounting version.

**Practical:**

adapter bowl EKA03 to simplify useful preparations for recessed mounting.

**Nice BlueBUS technology:**

all versions with the BlueBUS system allow an easy connection to the control unit of all devices with only two wires, by simply connecting them in parallel and selecting the jumpers for addressing according to the needed function.

The system automatically acquires the devices connected to the BlueBus network and allows automatic synchronization with multiple photocells in order to avoid other possible interferences.

**IB interface:**

allows the connection of photocells with Nice BlueBUS technology to control units having terminals for traditional contacts.

# ERA KEYPAD

**12 key digital selector, also with Nice BlueBUS technology, available in the recessed mounting version.**

## Wafer-thin

extremely strong metal body, 27 millimetres depth and only 13 mm from the wall for the recessed mounting version.

## Safe:

the combination is a 1 to 9 digit number, this allows the generation of 999,999,999 possible combinations!

Backlit keypad.

## Easy programming:

- 2 programming modes: Easy or Professional;
- possibility to program the number of uses of a specific combination;
- 255 storable combinations expandable, on EDS and EDSI up to 510 combinations with a second additional memory BM1000.

EDS  
EDSB

EDSI  
EDSIB

With a 0-Box interface you can manage easily any kind of programming of the BM1000 memory, in proximity of the system or also at a distance, directly from the office of the installer.

0-Box is interfaced with the PC, thus allowing an orderly storing of all installations.

## Nice BlueBUS technology:

Available with BlueBus system which allows an easy connection to the control unit of all devices with only two wires, by simply connecting them in parallel and other exclusive functions:

- 2 keys for the activation of two different commands chosen among 6 available ones (for example, step operation, close, open), depending on the control unit to which they are connected to;
- up to 4 control devices EDSB/EDSIB and ETPB which can be connected also with a mixed configuration;
- possibility of insertion of a block/unblock function.

**Two different visual signalling** depending on the state of automation:

- red: when the automation is closed or is closing;
- green: during opening operation or in the case in which the "automation block" function is active.

## DIGITAL SELECTORS

| <b>EKA03</b> | BOWL FOR RECESSED MOUNTING (DEPTH 66 mm) FOR INSTALLATION OF EKSI, EKSIÊU. ALSO COMPATIBLE WITH EPLIO, EPLIOB, EDSI, EDSIB | 50         |
| <b>EKA02</b> | FINISHING KIT FOR EDSI, EDSIB, EKSI, EKSIÊU INSTALLATION   | 10         |

# ERA KEYPAD WIRELESS

**12 key digital selectors, with radio connection, 100% wireless.**

**Digital radio selector with FloR 52 bit coding ;** is compatible with FloR with rolling code and generates 4.5 trillions of combinations, self-learning.

**Complete:**  
3 transmission channels to control 3 automated systems or 3 different customized commands for the single automated system.

**Comfortable:**  
no cabling needed and an estimated range of 25 m in free space and 15 m inside buildings.  
Backlit keypad.

**Safe:**  
the combination is a 0 to 8 digit number, this allows the generation of 99,999,999 possible combinations!

**Economic:**  
extremely reduced consumption, transmission is activated at the pressure of a key and turns off automatically. The ambient light sensor activates lighting of the keyboard only when this is necessary.

**Thin:**  
extremely strong metal body, only 27 millimetre depth.

# ERA TRANSPONDER READER

Transponder proximity reader for cards and badges, bimodal transmitters Flor-m, also with Nice BlueBUS technology.

## Easy programming:

- 2 programming modes: Easy or Professional;
- allows you to determine which cards/badges are enabled on the system;
- possibility of programming the number of uses available to a specific card or badge;
- 255 storable cards/badges expandable, on ETP, up to 510 cards/badges with a second additional memory BM1000.
- 2 modes (static and dynamic) to activate two different commands (ETP version).

With a 0-Box interface you can manage easily any kind of programming of the BM1000 memory, in proximity of the system or also at a distance, directly from the office of the installer.

0-Box is interfaced with the PC, thus allowing an orderly storing of all installations.

## Nice BlueBUS technology:

available with BlueBUS system which allows an easy connection to the control unit of all devices with only two wires, by simply connecting them in parallel and other exclusive functions:

- 2 modes (static and dynamic) for the activation of two different commands chosen among 6 available ones (for example, step operation, close, open), depending on the control unit to which they are connected to;
- possibility of inserting an automation block/unblock function;
- up to 4 control devices EDSB/EDSIB and ETPB which can be connected via BlueBUS, also with a mixed configuration;

## Transponder badge HSB1

Practical in use, can be added to the key chain so as to be always available.

## PROXIMITY READER

# ERA LIGHT

## Flashing signalling light.

**Available with different power supplies:**  
230 Vac, 24 Vdc and 12 Vdc.

**Practical:** body extremely resistant to shocks,  
suitable for fixing in any position.

**433.92 MHz antenna integrated in all versions.**

Protection class IP44.

| CODE | DESCRIPTION                                   | PCS./PACK. |

# WALLYGHT

**Optimal efficiency, extra long life:** the two 1 W-Leds guarantee a lifetime of 70.000 hours (continuous use).

**Horizontal, wall or ceiling mounting:** combined with the possibility of orienting the light beam and compact dimensions of the IP44 box, use of Wallyght is even more flexible.

## Multi-function LED indicator.

**The only version with 12/24 Vac/Vdc** power supply and flashing light function, courtesy light function or dusk sensor function.

**A new idea for improved safety:** when connected to compatible control units, Wallyght can act as a normal flashing light, or provide ambient lighting like a fixed courtesy light. When connected to a 12/24 Vac/Vdc output, Wallyght can remain permanently lit, and also be activated at dusk to then turn off at dawn thanks to the integrated dusk sensor.

# NICE SOLEMYO AIR NET SYSTEM

**Automation safety devices becomes  
wireless control systems!**

Photocells, sensitive edge and flashing lightings all acquire a new function: power is supplied by means of an integral miniature solar panel. The solar panel powers rechargeable batteries to ensure independent operation of the automation system in any conditions.

**Era Post Solemyo**  
Solemyo  
Era Photocell Post

# SOLEMYO

SOLEMYO 24V

**Solemyo is the solar power system to automate gates, garage doors and road barriers, even those located far from the electrical mains.**

Solemyo is available both in kit version and single products.

**Installable anywhere** without the need for connections or excavations, even in the most remote locations or those difficult to access with the power mains.

**Increased savings and respect for the environment** thanks to solar energy, free and clean: an ecological and intelligent choice with short term benefits.

**Low consumption with no risk of blackouts:** the extended duration of the energy reserve, combined with the low consumption of the automations, guarantee operation also in prolonged overcast conditions.

## THE KIT CONTAINS:

**SYP:** PHOTOVOLTAIC PANEL FOR 24 V SUPPLY.  
**PSY24:** 24 V BATTERY BOX WITH CONTROL CIRCUIT AND CARRY HANDLES. IT STORES THE ELECTRICAL ENERGY PRODUCED BY THE SYP PANEL, WITH CONTINUOUS AND PERMANENT SUPPLY THROUGHOUT THE DAY.  
**CABLES AND CONNECTORS NECESSARY FOR THE CONNECTION.**

PSY24

SYP

### Less consumption, more autonomous operation!

Perfect operation ensured even at night time or in prolonged overcast conditions, guaranteeing comfort and safety.

### Ease of use

The SYA1 auxiliary power supply unit enables rapid battery charging via a 230 Vac power mains, as an alternative to the photovoltaic module. Battery charge status LED indicators.

### Installation advice

If two or more parallel-connected solar panels have to be installed, purchase individually the items that make up the Solemyo system to increase the system's charging capacity or use just one SYA1 transformer to charge several PSY24 battery boxes.

## INSTALLATION DIAGRAM

FLEXIBLE: SOLEMYO ADAPTS PERFECTLY TO ALL TYPES OF INSTALLATION.

**The SYP30 photovoltaic panel,** sold individually, is ideal in all the situations with low exposure to the sun or automations with high intensity of use.

# NICE SOLEMYO AIR NET SYSTEM

## So many benefits!

**Quick installation:** no need to lay wiring to connect the accessories to the control unit, drilling holes or laying raceways: just position them as appropriate and let the control unit identify them.

Devices interface with the control unit by means of a special, very compact interface module that can be fitted directly inside the motor, or the control unit, if separate.

## Better appearance, flexible positioning of devices over time:

it is very easy to add (or remove) devices, with no need to search for a mains connection point or a contact for series connection.

## Extremely reliable transmission:

### the radio system allows two-way communication -

each device does not just respond to the control unit's instructions but sends a feedback signal, confirming that it is present and operational, and it also signals the occurrence of events such as the passage of an object between the two photocells.

## Operating Frequency: 868 MHz, less liable to interference.

Two separate channels are used, for a 100% guarantee of the system's operation and safety even in case of sudden interference.

**Intelligent system:** it detects whether any interference is from another Nice wireless automation unit.

In this case, the "new" automation system just installed selects two communication channels different from those used by the existing system, keeping the two systems' channels separate.

Each device has LEDs in the bottom indicating the signal quality and troublefree operation of the system, which can be checked immediately in the event of malfunction or at first start-up.

A LED flashes when the device is receiving enough solar power to allow recharging.

## Solemyo Era Photocell

**Pair of PHW two-way wireless photocells,** with photovoltaic cell power supply.

**Easy installation:** the receiver photocell has a special LED that indicates the degree of alignment with the transmitter photocell, very useful during initial installation.

## Solemyo Era Light

**Wireless LLW flashing light,** with extremely high-efficiency LEDs lower consumption and virtually unlimited lifetime (no more blown lamps needing frequent changing).

Light output adapts to ambient conditions to ensure good visibility even in direct sunlight and to save energy during the hours of darkness.

Can be used as flashing signal or courtesy light.

## COMPATIBILITY/INTERFACE TABLE

NICE&SAFE

**Even safer automation thanks to the Nice Solemyo Air Net System's new sensitive edge sensors.**

**No connection, totally wireless, powered by the sun.**

### Energy saving

thanks to the solar power cell built into the TCW2, with rechargeable batteries.

Version with battery-only operation is also available in case of installations with low exposure to sunlight.

**Unbeatable safety** thanks to the "wireless" system for detection and communication between sensitive edge, interface and control unit, allowing swift action when an obstacle is detected.

### Quick and easy to install:

maximum flexibility in installing the devices.  
Possibility of connection to 8.2 KOhm resistive sensitive edges.

**State-of-the-art technology: IBW interfaces,** for Nice BlueBus-compatible control units, and **IRW**, interfaces, for control units without BlueBus connection, allow radio communication with **TCW** sensors.

### Suitable for any architectural context

Compact size: 99x49x33.

\* The stated estimates refer to edges functioning for about 15 operations per day, with complete cycle time of 60 seconds (900 seconds per day).

### INSTALLATION DIAGRAM

\*IBW or IRW depending on the motor (only IBW accepts also PHW and LLW)

#### TCW + IBW

The IBW is connected to the control unit's BlueBUS terminal and communicates with the TCW by radio. Compatible also with PHW wireless photocell and LLW wireless flashing light.

#### TCW + IRW

IRW is connected to safety input (Stop and Photo) of control unit and communicates via radio with TCW.

## 8.2 KOhm resistive sensitive edges, maximum safety and control of the automation.

**Safer:** if there are any faults in the system like, for example, the product itself has broken down, the edges will communicate this to the control unit. The TCE interface board enables users to connect sensitive edges (with 8.2 KOhm resistance) to those control units which are not equipped with a special input.

### The length can be personalised:

the components supplied in the kits enable installers to build sensitive edges of the correct dimension.

**Practical:** they adapt to any kind of situation and can be installed quickly.

**Reliable:** the new Class3 technology means that the control unit, the sensitive edges are connected to, can understand if the device is functioning correctly, or if it is out of use.

### 8.2 KOhm analogical-type input.

## Mechanical sensitive edges, more safety and easy installation.

**CMA** is the pre-assembled, high mechanical edge consisting in aluminium profiles of 1.5 - 1.7 - 2 - 2.5 m in length; ideal for assembly on sliding or swing gates.

**CMBK** is the kit for installing a low mechanical edge: for edges max. 4 m (CMBK4) and for edges max. 6 m (CMBK6), ideal for garage doors in general, up-and-over and sectional doors.

**CB** is a protective rubber pad. Fitted to the CMBK4/CMBK6 kit, it forms the low mechanical edge.

### Mechanical sensitive edges

# FT210

NICE&SAFE

BLUEBUS

**Optical device, with wireless transmitter to secure on moveable leaf, horizontally adjustable through 210° and 30° vertically, for an automation according to Standards.**

### Consideration towards personal safety and product quality.

The safety level of the main edge, required by the EN12453 standard, can be achieved for any "type of use" and any "type of activation" by integrating a FT210/FT210B device to an 8.2 KOhm TCB65 type resistive sensitive edge.

The FT210/FT210B device, integrated with a "resistive" sensitive edge (8.2 KOhm), is safe against individual faults (category 3 according to the EN 954-1 standard) or can be used with automated systems with self-diagnosis at the start of every manoeuvre (category 2 according to the EN 954-1 standard).

### Additional models

Versions with relay output (FT210), with Nice BlueBUS technology (FT210B), available with 2 Ah (FTA2) and 7Ah (FTA1) battery Kit, for intensive use.

### Cutting-edge technology

The anti-collision circuit avoids interference with other out-of-sink receivers.

The FT210/FT210B optical devices are equipped with a special sensor capable of recognizing when the gate is motionless, which remains in a low consumption mode and activates only when the gate is in motion. Range adjustable on 2 levels; alignment with proportional LED for easy and safe installation.

### Suitable for any architectural environment and easy to install

Reduced dimensions: 46x128x45; electrical connections can also be made from the lower section of the box.

### Resilient and safe

Polycarbonate casing; FA1 vandal-proof metal shell (optional); low transmitter battery indicator.

# F210

BLUEBUS

**Synchronised photocells horizontally adjustable through 210° and 30° vertically. Simply perfect installations.**

### The 210° solution

The beam of the Nice F210 and F210B photocells has a horizontal scope of 210°, thereby increasing the safety level of the system and simplifying installation: the gate or garage door to be automated quite often slide flush with the wall making it very difficult to position the photocell.

### Numerous models and countless advantages

The new photocells are available with relay output (F210) or with the Nice BlueBUS technology (F210B).

With the BlueBUS technology, all devices can be easily connected to the control unit with just two wires.

Sensors with the BlueBUS technology can be connected to incompatible control units by means of an IB interface. The devices that are connected to the BlueBUS network are automatically acquired by the system.

### Suitable for any architectural environment and easy to install

Reduced dimensions: 46x128x45 mm; electrical connections can also be made from the lower section of the box.

### Resilient and safe

Polycarbonate casing; FA1 vandal-proof metal shell (optional).

### Cutting-edge technology

The problem of interference between the sensors and the automatic synchronisation between several pairs of photocells is solved by the anti-blinding circuit; high range adjustable on 2 levels; synchronising circuit; alignment with proportional LED for easy and safe installation.

# KIO

**KIO, key-operated selector switch for low voltage contacts, with release mechanism for metal cord,** ideal for the automation of sectional doors, folding doors and rolling gates.

**User-friendly:**

Kio is both a key-operated selector switch and a release device. Its design makes it very convenient and effortless to use, and easy to install anywhere thanks to its very narrow outline.

**Long-lasting:** Kio is made of cast aluminium, epoxy powder coated for greater durability.

**Easy:** LED allows you to locate the selector switch even in total darkness.

**More safety:** coded key.

Release device activated directly by opening the door or by the winding device.

**The very first product to incorporate the key-operated control and release motor functions.**

KIO

KA1

| CODE | DESCRIPTION  | PC/PACK |
|------|--|---------|
| KIO  | KEY-OPERATED SELECTOR SWITCH FOR LOW VOLTAGE CONTACTS, WITH RELEASE MECHANISM FOR METAL CORD | 1       |
| KA1  | 6 m CABLE RELEASE KIT FOR KIO  | 1       |

# KIOMINI

**KIOMINI, aluminium key switch with control and release mechanism for metal cord.**

**Practical:** KIOMINI is both a lever for the release mechanism for metal cord and a control mechanism for the direct or through a control unit activation of a single phase motor.

**Resistant:** a vandal-proof die-cast aluminium casing. The access to the sector is possible by a thick door with closing key.

**Comfortable:** thanks to its small dimensions, it is easy and compact to install.

KA1

# HEATING DEVICE

**PW1, heating element:** it maintains a suitable temperature for the automation system to operate correctly, **even under the most severe of weather conditions.**

This is a particular type of **resistance** that can reach temperatures close to 100°C under normal environmental conditions.

**Effective:** each element has a consumption of 20 W and is extremely efficient thanks to the silicone sheath that covers the resistance and increases the diffusion of heat.

**Independent:** the device is directly fed by a 230/120 Vac power supply through the TW1 thermostat, and because it doesn't burden the transformer of the product itself, the performance characteristics of the gear motor remain the same.

## TW1, regulation thermostat for PW1:

when the detected temperature drops below the set threshold, the thermostat activates the heating element PW1 thereby slowly increasing the internal temperature of the product itself; the heating action is maintained until the detected surrounding temperature stabilizes at the set levels.

**Easy to program:** the intervention threshold can be regulated between 0°C and -20°C.

**Safe:** equipped with a button so that an operational test can be performed at any time. The status of the outputs is continuously verified by means of Leds.

SOLEMYO OPERA BLUEBUS 24V

## Control unit for 24 Vdc gear motors with magnetic encoder, for swing gates.

Equipped with Nice **BlueBUS** technology and compatible with the **Solemyo** solar power system and **Opera** system for management, programming and diagnostics of automations, also remotely.

Compatible with the Opera system, which thanks to the O-View multi-function display enables personalisation of the system, modifying the opening and closing positions, leaf offset and deceleration intervals, and diversifying parameters such as force, speed, and obstacle detection for each motor.

Microprocessor logic: in addition to the classic functions such as intelligent clutch with anti-crushing safety device, gradual start-up and deceleration, automatic memorisation of both travel limit positions and the pedestrian door function, Moonclever also offers the advantages of the Opera system.

**Safe and reliable** thanks to obstacle detection with dual technology and monitoring of motor absorption and speed via the encoder, throughout door/gate travel, with provision for connection of latest generation resistive sensitive edges.

**Intelligent:** on start-up, indicator to confirm correct power supply and efficient operation of the control unit; automatic fault diagnostics and signalling via the flashing light and confirmation leds.

**Savings, respect for the environment, and autonomy:** when connected to the buffer battery or Solemyo kit, consumption on standby is reduced to just 0.1 W.

**Installation couldn't be simpler,** thanks to the system BlueBUS, enabling connection of the control unit, motors and accessories by means of just two wires.

**No black out:** operation in the event of a power failure by means of optional batteries (PS124) with compartment in control unit.

**Radio receiver:** provision for insertion of SM snap-fit receivers.

# MINDY A500

## Mindy A500 control unit, three-phase 230 V, 400 V or single-phase 230 Vac motor, 1.5 Kw.

Automatic detection of obstacles, door block, brake.

Pull-out terminal boards.

# MINDY A6F, A60, A700F

**Mindy A6F, A60 control units, for two motors; microprocessor logic.**

Pull-out terminal boards (A6F and A60 models).  
Two photocell inputs with separate functions.  
Electrical (A6F model) or electronic (A6F and A60 models) adjustment.  
Gradual departure and slowdown (A60).  
Adjustment is separate to the work times (A60).

PUL

**Mindy A700F control unit, for two motors; microprocessor logic.**

Removable terminal boards; two photocell inputs; four limit switch inputs; partial opening (standard).  
Unbeatable performance due to the many programmable functions.  
PIU expansion card can be inserted to provide more functions.

# MINDY A924

**Mindy A924 control units (only for Sumo)**

24 V version for one dc motor, complete with encoder.  
Intelligent clutch with anti-crush safety feature.  
Automatic memorization of limit switches on opening and closing; gradual departure and slowdown.  
Pedestrian passage function "service".  
Warning light for maintenance (can be programmed).  
Built-in battery charger. Pull-out terminal boards.

F = with the AR accessory connected.  
R = with the PER accessory connected.  
A = with the AP accessory connected.  
P = with the PIU accessory connected.  
B = only an input can be programmed.  
\*1 = addition of the 2nd motor authorised.  
\*2 = not referred to a unit of time but to a distance.  
\*3 = programmable output.  
\*4 = just one programmable input/output.  
\*5 = programmable with 0-View.

# ALPHABETICAL INDEX

| CODE     | PRODUCT LINE   | PAGE | CODE      | PRODUCT LINE  | PAGE |
|----------|--|------|-----------|---|------|
| A01      | Control unit for rolling doors without automatic closing   | 220  | CABLA06   | Cable for programming receivers universal in the series SMX and OX  | 182  |
| A02      | Control unit for rolling doors with automatic/ semiautomatic closing   | 220  | CABLA07   | Cable for cloning transmitters in the series Ergo and Plano   | 182  |
| A500     | Control unit for a three-phase or single-phase motor   | 220  | CABLA09   | Cable for cloning transmitters in the series Era-Flor   | 182  |
| A60      | Control unit for two motors with electric clutch   | 221  | CARICA    | Plug-in card for battery charger  | 221  |
| A6F      | Control unit for two motors 230 Vac, with electric clutch, pull-out terminal boards                                      | 221  | CB        | Mechanical sensitive edges - protective rubber pad  | 211  |
| A700F    | Control unit for two motors with electric clutch, possibility of adding PIU  | 221  | CHEU      | Neutral key for EKSEU, EKSI EU  | 200  |
| A924     | Control unit for one motor with encoder  | 221  | CHS       | Neutral key for EKS, EKSI   | 200  |
| ABF      | Tuned directional aerial, for mounting on bracket  | 176  | CM-B      | Mechanical sensitive edges, length 1.5 m  | 99   |
| ALA1     | Battery charger power supply unit  | 182  | CMA 1,5MT | Mechanical sensitive edges, length 1.7 m  | 211  |
| B12-B    | 12 V, 6 Ah batteries   | 221  | CMA 1,7MT | Mechanical sensitive edges, length 2 m  | 211  |
| B12V-C   | 12 V, 2 Ah battery   | 221  | CMA 2MT   | Mechanical sensitive edges, length 2.5 m  | 211  |
| BA3-A    | Nice battery box   | 221  | CMA 2,5MT | Pawl with two metal release keys  | 211  |
| BFAB5024 | Big-Fab, Motor for swing gates, underground installation, with leaves up to 5 m, with mechanical limit switch on closing | 82   | CMBK4     | Kit for installing a low mechanical edge, with aluminium profiles measuring 4 m (to use together with CB) | 211  |
| BFABBOX  | Fab accessory, Foundation box with cataphoresis paint finish   | 82   | CMBK6     | Kit for installing a low mechanical edge, with aluminium profiles measuring 6 m (to use together with CB) | 211  |
| BFABBOXI | Fab accessory, Stainless steel foundation box  | 82   | CRA1      | Mechanical accessory, shaft with 18-tooth pinion  | 151  |
| BM1000   | Additional memory card (255 codes memory)  | 201  | CRA2      | Mechanical accessory, joint for chain   | 151  |
| BMA1     | L-Fab and Big-Fab accessory, Accessory for opening up to 360°  | 81   | CRA3      | Mechanical accessory, 1/2" chain, 1 m pack, plus joint for chain  | 151  |
| BMA2     | L-Fab and Big-Fab accessory, Adapters for the installation of two motors   | 80   | CRA4      | Mechanical accessory, 1/2" chain, 5 m pack, plus joint for chain  | 151  |
| CABLA01  | Cable for connecting O-Box to the computer   | 182  | CRA5      | Mechanical accessory, tensioner drive with brackets   | 151  |
| CABLA02  | Optical reader for programming transmitters Bio and FloR   | 182  | CRA6      | Mechanical accessory, 36-tooth pinion   | 151  |
| CABLA03  | Cable for cloning transmitters in the series Very  | 182  | CRA7      | Mechanical accessory, 18-tooth pinion   | 151  |
| CABLA04  | Cable for cloning transmitters in the series FloR  | 182  | CRA8      | Mechanical accessory, wall-fixing bracket   | 151  |
| CABLA05  | Cable for programming tubular motors, equipped with port TTBUS   | 182  | CRA9      | Mechanical accessory, adapter for shafts  | 149  |

| <b>DBM10</b>   | Complete kit for electrical connection of sensitive edges, for gates up to 10 m   | <b>210</b> |
| <b>DBM5</b>    | Complete kit for electrical connection of sensitive edges, for gates up to 5 m  | <b>210</b> |
| <b>DBM7,5</b>  | Complete kit for electrical connection of sensitive edges, for gates up to 7.5 m  | <b>210</b> |
| <b>EDS</b>     | Era Keypad, digital selector 12 keys to be combined with the MORX decoder   | <b>198</b> |
| <b>EDSB</b>    | Era Keypad, 12 key digital selectors with nice blueBUS technology, burglar-resistant metal body                             | <b>198</b> |
| <b>EDSI</b>    | Era Keypad, 12 key digital selectors with nice blueBUS technology, for recessed mounting burglar-resistant metal body       | <b>198</b> |
| <b>EDSIB</b>   | Era Keypad, digital selector 12 keys, for recessed mounting, to be combined with the MORX decoder                           | <b>198</b> |
| <b>EDSWG</b>   | Era Keypad wireless, 13 key digital selector, with radio connection   | <b>199</b> |
| <b>EKA01</b>   | Era Post, plug for mounting of EKS, EKSEU, EDS, EDSB, EDSW, ETP, ETPB, on PPH2 post   | <b>202</b> |
| <b>EKA02</b>   | Finishing kit for EDSI, EDSIB, EKSI, EKSI EU installation   | <b>198</b> |
| <b>EKA03</b>   | Bowl for recessed mounting (depth 66 mm) for installation of EKSI, EKSI EU. also compatible with EPLIO, EPLIOB, EDSI, EDSIB | <b>197</b> |
| <b>EKS</b>     | Era Key Switch, key selector for outdoor installation   | <b>200</b> |
| <b>EKSEU</b>   | Era Key Switch, key selector, european cylinder, for outdoor installation   | <b>200</b> |
| <b>EKSI</b>    | Era Key Switch, key selector for recessed mounting  | <b>200</b> |
| <b>EKSI EU</b> | Era Key Switch, key selector, european cylinder, for recessed mounting  | <b>200</b> |
| <b>EL</b>      | Era Light, Neutral flashing signal light, 230 Vac, for preset control units   | <b>204</b> |
| <b>EL24</b>    | Era Light, Neutral flashing signal light, 24 Vac/Vdc, for preset control units  | <b>204</b> |
| <b>ELB</b>     | Era Light, Neutral flashing signal light, 12 Vac/Vdc, for preset control units  | <b>204</b> |
| <b>EPL</b>     | Era Photocell L, pair of surface-mounted photocells large   | <b>197</b> |
| <b>EPLB</b>    | Era Photocell L, pair of surface-mounted photocells large, 30° positionable   | <b>197</b> |
| <b>EPLIO</b>   | Era Photocell L, pair of surface-mounted photocells large, 30° positionable, with Nice BlueBUS technology                   | <b>197</b> |
| <b>EPLIOB</b>  | Era Photocell L, pair of surface-mounted photocells large, with Nice BlueBUS technology                                     | <b>197</b> |
| <b>EPLD</b>    | Era Photocell L, pair of photocells large for recessed mounting, 30° positionable   | <b>197</b> |

| CODE              | PRODUCT LINE  | PAGE       |
|-------------------|---|------------|
| <b>EPLD</b>       | Era Photocell L, pair of photocells large for recessed mounting, 30° positionable, with Nice BlueBUS technology           | <b>197</b> |
| <b>EPM</b>        | Era Photocell M, pair of outdoor photocells   | <b>195</b> |
| <b>EPMA</b>       | Era Photocell M, pair of outdoor photocells, 30° positionable   | <b>195</b> |
| <b>EPMAB</b>      | Era Photocell M, pair of outdoor photocells, 30° positionable, with Nice BlueBUS technology                               | <b>195</b> |
| <b>EPMA0</b>      | Era Photocell M, pair of outdoor photocells, burglar-resistant metal body   | <b>195</b> |
| <b>EPMA0B</b>     | Era Photocell M, pair of outdoor photocells, 30° positionable, burglar-resistant metal body                               | <b>195</b> |
| <b>EPMB</b>       | Era Photocell M, pair of outdoor photocells, 30° positionable, burglar-resistant metal body, with Nice BlueBUS technology | <b>195</b> |
| <b>EPMO</b>       | Era Photocell M, pair of outdoor photocells, burglar-resistant metal body, with Nice BlueBUS technology                   | <b>195</b> |
| <b>EPMOB</b>      | Era Photocell M, pair of outdoor photocells, with Nice BlueBUS technology   | <b>195</b> |
| <b>EPS</b>        | Era Photocell S, pair of outdoor photocells slim  | <b>193</b> |
| <b>EPSA</b>       | Era Photocell S, pair of outdoor photocells slim, burglar-resistant metal body  | <b>193</b> |
| <b>EPSAB</b>      | Era Photocell S, pair of outdoor photocells slim, with Nice BlueBUS technology, burglar-resistant metal body              | <b>193</b> |
| <b>EPSB</b>       | Era Photocell S, pair of outdoor photocells slim, with Nice BlueBUS technology  | <b>193</b> |
| <b>ERA P VIEW</b> | Multifunction radio transmitter with intuitive graphic interface, to manage up to 99 devices singly or in groups          | <b>165</b> |
| <b>ETP</b>        | Era Transponder Reader, proximity reader for transponder cards MOCARD and MOCARDP to be combined with the MORX decoder    | <b>201</b> |
| <b>ETPB</b>       | Era Transponder Reader, proximity reader for transponder cards with Nice BlueBUS technology                               | <b>201</b> |
| <b>F210</b>       | Pair of synchronised photocells, with relay output  | <b>213</b> |
| <b>F210B</b>      | Pair of synchronised photocells, with the Nice BlueBUS technology   | <b>213</b> |
| <b>FA1</b>        | Vandal-proof metal shell for optical devices  | <b>212</b> |
| <b>FA2</b>        | Bracket for fixing vandal-proof metal shell to PPH2 and PPH1 columns  | <b>212</b> |
| <b>FLO1RCE</b>    | Era FloR transmitter, 1 channel, with sequential code for multiple insertion  | <b>171</b> |
| <b>FLO1RE</b>     | Era FloR transmitter, 1 channel   | <b>171</b> |
| <b>FLO2RCE</b>    | Era FloR transmitter, 2 channels, with sequential code for multiple insertion   | <b>171</b> |

|-----------|--|------|---------|---|------|
| FLO2RE    | Era FloR transmitter, 2 channels   | 171  | H07224  | Hopp, Motor for swing gates up to 2.4 m, with articulated arm, without control unit                                       | 62   |
| FLO4RCE   | Era FloR transmitter, 4 channels, with sequential code for multiple insertion  | 171  | HOPPKCE | Hopp, Kit for swing gates with leaves up to 2.4 m, externally mounted   | 64   |
| FLO4RE    | Era FloR transmitter, 4 channels   | 171  | HSB1    | Trasponder badge for proximity reader   | 167  |
| FLOX2R    | Universal receiver, 2 channels with BM250 memory   | 167  | HSTS2IT | Touch screen wireless for managing Nice home automation   | 167  |
| FT210     | Pair of optical devices for sensitive edges, with relay output   | 212  | HSTSA1  | Base di ricarica per touch screen completa di batterie ricaricabili   | 167  |
| FT210B    | Pair of optical devices for sensitive edges, with BlueBUS technology   | 212  | HY7005  | Hyppo, Motor for swing gates up to 3 m, articulated shear-proof arm, with limit switch on opening and closing             | 70   |
| FTA1      | 7 Ah battery kit for FT210/FT210B transmitters, for intensive use  | 212  | HY7024  | Hyppo, Motor for swing gates up to 3 m, with magnetic encoder, with shear-proof articulated arm                           | 70   |
| FTA2      | 2 Ah battery kit for FT210/FT210B transmitters   | 212  | HY7100  | Hyppo, Motor for folding 2-leaf doors, 230 Vac, with telescopic arm and limit switch on opening and closing               | 152  |
| GR170     | Giro, Irreversible gear motor, with brake and release device, lifting force up to 170 kg                                       | 156  | HY7124  | Hyppo, Motor for folding 2-leaf doors, with telescopic arm and limit switch on opening and closing, with magnetic encoder | 152  |
| GR170E01  | Giro, Irreversible gear motor, with brake and release device, lifting force up to 170 kg, power supply cable included          | 156  | HYA11   | Hyppo, Unlock from inside with a 6 m cord   | 153  |
| GR170R    | Giro, Reversible gear motor, without brake, lifting force up to 170 kg   | 156  | HYA12   | Hyppo, Longer articulated arm   | 71   |
| GR170RE01 | Giro, Reversible gear motor, without brake, lifting force up to 170 kg, power supply cable included                            | 156  | HYKEKCE | Hyke, Kit for swing gates with leaves up to 3.5 m, with articulated arm, externally mounted                               | 68   |
| GR340E01  | Giro, Irreversible gear motor, bi-motor with brake and release device, lifting force up to 340 kg, power supply cable included | 156  | IB      | Interface for connecting BlueBUS photocells up to control units which have not been manufactured for this purpose         | 193  |
| GRA01     | Giro accessory, second motor for GR170 complete with accessories for simultaneous release                                      | 157  | IBW     | Interface between PHW/LLW and control units with BLUEBUS system   | 208  |
| GRA02     | Giro accessory, adapter for 48 mm diameter shafts  | 157  | INB     | Communication interface between Bticino Bus (SCS) and Nice Bus (TTBus and BusT4)  | 181  |
| GRA03     | Giro accessory, adapter for 240 mm diameter pinion   | 157  | INTI1   | Era Inti transmitters, 1 channel, 433,92 MHz, black   | 168  |
| HK7024    | Hyke, Motor for swing gates up to 3.5 m, with articulated arm and control unit   | 66   | INTI1B  | Era Inti transmitters, 1 channel, 433,92 MHz, blue  | 168  |
| HK7024HS  | Hyke HS, Hi-Speed motor for swing gates up to 3 m, with magnetic encoder, complete with articulated arm and control unit       | 26   | INTI1G  | Era Inti transmitters, 1 channel, 433,92 MHz, green   | 168  |
| HK7224    | Hyke, Motor for swing gates up to 3.5 m, with articulated arm  | 66   | INTI1L  | Era Inti transmitters, 1 channel, 433,92 MHz, lilac   | 168  |
| HK7224HS  | Hyke HS, Hi-Speed motor for swing gates up to 3 m, with articulated arm, without built-in control unit                         | 26   | INTI1R  | Era Inti transmitters, 1 channel, 433,92 MHz, red   | 168  |
| HKA1      | Hyke, Spare control unit for HK7024  | 67   | INTI1Y  | Era Inti transmitters, 1 channel, 433,92 MHz, yellow  | 168  |
| HKA2      | Hyke HS accessory, Spare control unit for HK7024HS   | 27   | INTI2   | Era Inti transmitters, 2 channels, 433,92 MHz, black  | 168  |
| H07124    | Hopp, Motor for swing gates up to 2.4 m, with articulated arm and control unit   | 62   | INTI2B  | Era Inti transmitters, 2 channels, 433,92 MHz, blue   | 168  |

| INTI2R    | Era Inti transmitters, 2 channels, 433,92 MHz, red   | 168  |
| INTI2Y    | Era Inti transmitters, 2 channels, 433,92 MHz, yellow  | 168  |
| INTIKIT   | Era Inti, Kit composed by three 2-channel transmitters Era Inti (red, green, blue) and one receiver DX2                            | 168  |
| IRW       | Wireless relay interface for sensitive edges   | 209  |
| KA1       | 6 m cable release kit for KIO  | 214  |
| KIO       | Key-operated selector switch for low voltage contacts with release mechanism for metal cord  | 214  |
| KIOMINI   | Aluminium key switch with control and release mechanism  | 214  |
| L9BAR     | Road barrier system for bars from 7 to 9 m, steel case with protective cathaphoresis treatment                                     | 116  |
| L9BARI    | Road barrier system for bars from 7 to 9 m, stainless steel case   | 116  |
| LFAB4000  | L-Fab, Motor for swing gates, underground installation, with leaves up to 4 m, with mechanical limit switch on closing             | 80   |
| LFAB4024  | L-Fab, Motor for swing gates, underground installation, with leaves up to 4 m, with encoder and mechanical limit switch on closing | 80   |
| LFABBOX4  | L-Fab accessory, Foundation box with cathaphoresis paint finish  | 80   |
| LFABBOX4I | L-Fab accessory, Stainless steel foundation box  | 80   |
| LLW       | Wireless flashing light with built-in photovoltaic panel   | 208  |
| LP21      | Single-channel metal mass detector 24 V power supply   | 211  |
| LP22      | Two-channel metal mass detector 24 V power supply  | 211  |
| M3BAR     | Road barrier system for bars of 3 m, steel case with protective cathaphoresis treatment  | 112  |
| M3BARI    | Road barrier system for bars of 3 m, stainless steel case  | 112  |
| M5BAR     | Road barrier system for bars of 4 or 5 m, steel case with protective cathaphoresis treatment                                       | 112  |
| M5BARI    | Road barrier system for bars of 4 or 5 m, stainless steel case   | 112  |
| M7BAR     | Road barrier system for bars of 5, 6 or 7 m, steel case with protective cathaphoresis treatment                                    | 112  |

| CODE       | PRODUCT LINE  | PAGE |
|------------|---|------|
| M7BARI     | Road barrier system for bars of 5, 6 or 7 m, stainless steel case   | 112  |
| MC424L     | Control unit for swing gates with one or two 24 Vdc motors, with Solemyo technology                               | 219  |
| MC824H     | Control unit for one or two motors at 24 Vdc, with BlueBUS technology, compatible for Opera and Solemyo systems   | 218  |
| MCA1       | Spare control unit for MC824H   | 218  |
| MCA2       | Spare control unit for MC424L   | 219  |
| MEA1       | Mechanical accessory for opening up to 360° for gates max. 2.5 m in length  | 29   |
| MEA2       | Fab accessory, Key unlock system  | 29   |
| MEA3       | Fab accessory, Lever-type key unlock system   | 29   |
| MEA5       | Fab accessory, Lever-type unlock key for MEA3   | 29   |
| MEA6       | Fab accessory, Limit switch bracket   | 29   |
| MFAB3000   | M-Fab, Motor for swing gates with leaves up to 3 m, underground installation, grease lubrication, increased speed | 78   |
| MFAB3000L  | M-Fab, Motor for swing gates with leaves up to 3 m, underground installation, grease lubrication, cruising speed  | 78   |
| MFAB3024   | M-Fab, Motor for swing gates with leaves up to 3 m  | 78   |
| MFAB3024HS | M-Fab HS, Hi-Speed motor for swing gates with leaves up to 3 m, with magnetic encoder                             | 28   |
| MFABBOX    | Fab accessory, Externally chamfered foundation box with cathaphoresis finish with mechanical stop on opening      | 28   |
| MFABBOXI   | Fab accessory, Externally chamfered foundation box in stainless steel with mechanical stop on opening             | 28   |
| MOCARD     | Transponder card programmable via OBOX  | 201  |
| MOCARDP    | Transponder card programmable via OBOX, with sequential coding  | 201  |
| MORX       | Decoder for 1 ETP or up to 4 EDS/EDSI connected in parallel with memory BM1000                                    | 198  |
| NKA3       | Spare control unit  | 89   |
| NKSL400    | Naked, Concealed motor for swing gates up to 400 kg, with control unit and absolute encoder                       | 89   |
| NSEA       | Instrument for force impact measurement, angular extension  | 210  |
| NSEL       | Instrument for force impact measurement, straight extension   | 210  |
