

USER MANUAL: STronic URP 450

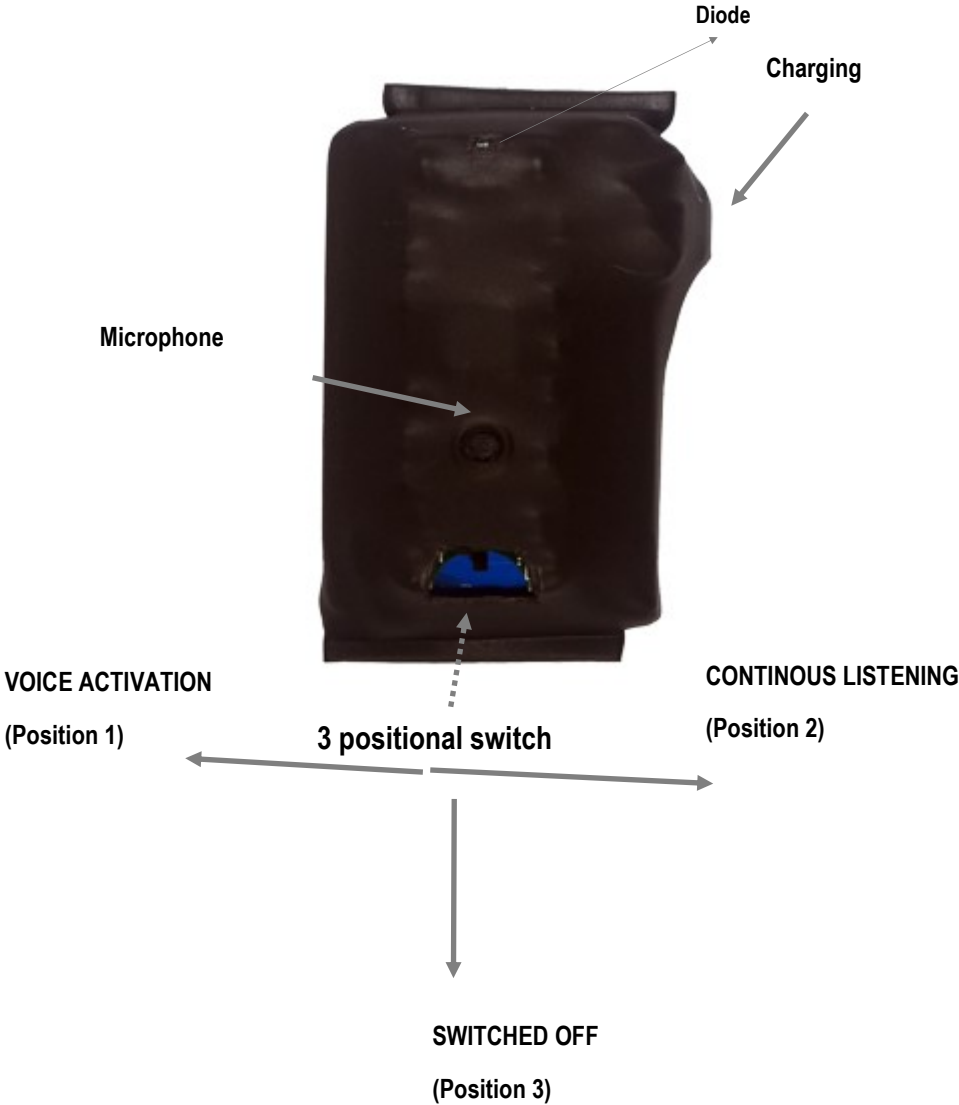

STronic URP 450 is very powerful yet very small device. It has a USB MINI port for easy data extraction. The module is equipped with very sensitive microphone which allows you to get really good quality sound with extra long battery life. It has extended memory to **8gb** and internal program for time setting.

Device is very compact and easy to use.

STronic URP 450

QUICK SET-UP GUIDE:

IMPORTANT:

- DEVICE CHARGES WITH CABLE ONLY (faster charging is with enclosed adaptor)
- USE APPROPRIATE OPERATING SYSTEM (Windows XP,7,8,8.1, 10 & MacOs)
- DEVICE IS NOT WATER RESISTANT

When you place the device on the table, with the connector facing up, like on the FIGURE 2, and you push the switch **to the left** you will activate the mode of continuous listening. In the basic module STronicURP 450 the second number denotes the amount of hours in this case **150 hours** that the device can record.

When you place the device on the table, with the connector facing up, like on the FIGURE 2, and you push the switch **to the right** you will activate the mode of continuous listening. In the basic module STronicURP 450 **the first number** denotes the amount of days in this case **250 days** that the device can last in standby.

When you put this device into Position 3, it will be SWITCHED OFF.

Time set-up

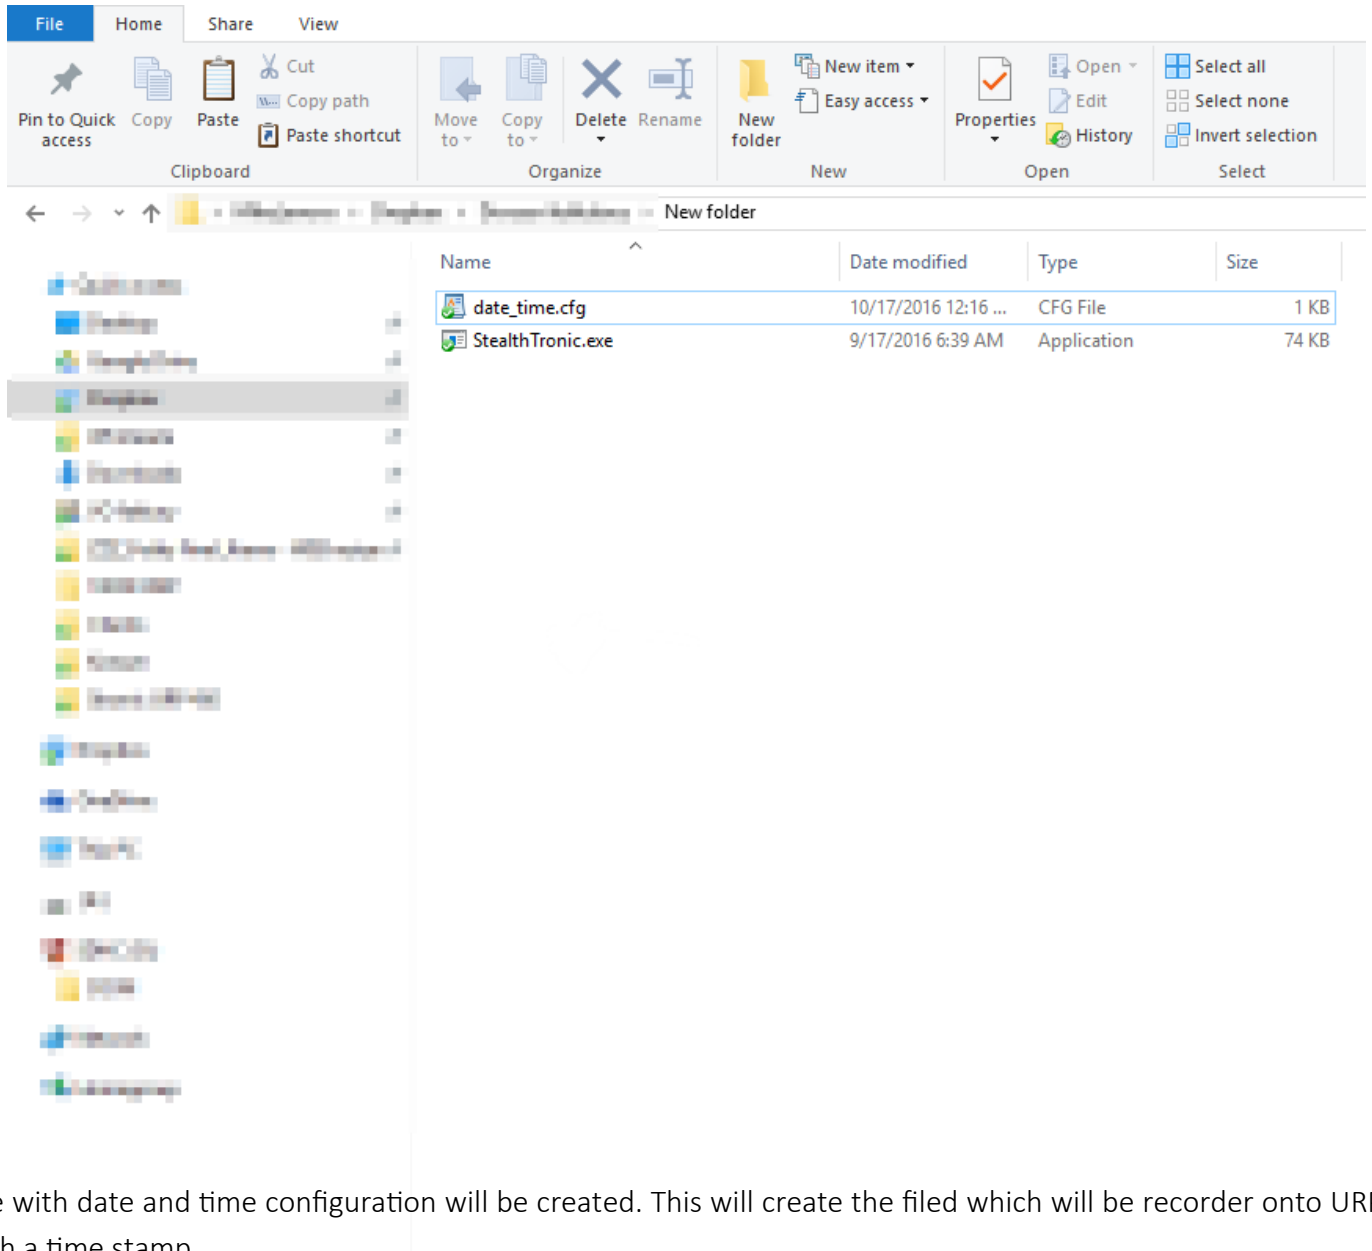

Run the application [StealthTronic.exe](#)

Select the desired

- YYYY = Year = 2016
- MM = Month = 10
- DD = Day = 02

This date would refer to 2.10.2016

File with date and time configuration will be created. This will create the file which will be recorded onto URP with a time stamp.

TIP: If you need to make recording from last year, you can simply change the time to whatever date you need.

TECHNICAL SPECIFICATION

Battery Life:	140 Hrs
